I. Introduction

Sweet Pets Haven (SPH) is a foster house and rehab shelter for rescued cats and dogs in Cavite. SPH promotes responsible rescuing and rehoming through adoption instead of buying, selling, or breeding pets. SPH aims to help the rescue of cats and dogs through volunteers, donations, sponsors, and opening adoptions for the animals. Assistance is being sought for helping the dogs through willing donors and volunteers available to visit the animal shelter. SPH needs more support to prevent and fight against the sickness of cats and dogs being surrendered to the shelter or those being encountered by volunteers. After treating cats and dogs from viruses such as distemper or parvo, new owners are sought for them.

To receive funding for needed supplies such as food and medicines for the rescued cats and dogs, SPH is humbly asking for donations by either including their E-wallet number in Facebook posts or by asking interested donors to send a private message. Because of people who abandon their pets after experiencing inconveniences in taking care of them, SPH becomes a shelter for the surrendered cats and dogs. SPH continues to update its Facebook account with updates on new rescued cats and dogs in Cavite, calls for donation of supplies due to viruses/virus outbreak, and former rescue cats and dogs being finally adopted. Those who will adopt the rescue cats and dogs are not charged for adoption, but a screening is conducted by SPH and the process will be further discussed by messaging the SPH page directly.

II. Problem Statement & Objectives

As SPH highly relies on funds donated to them for buying supplies, medicines, and vaccines for the rescued cats and dogs, they lack fund allocation for the development of a decent website for easy navigation and use for those interested to support SPH through volunteering, adoption, and the fostering of the rescue animals. Having a website may not be prioritized as their resources and manpower are already very limited to properly care for the rescued animals. Currently, interested individuals need to browse through SPH's Facebook posts and scroll through an array of posts which are arranged from the latest to the oldest posts, from top to bottom. This can become tedious as the posts are unfiltered and ungrouped because there are posts created about animals available for adoption and posts created asking for donations. This makes it hard for the user to browse the page with a specific goal in mind.

To help SPH in achieving their goal to aid the rescued animals of Cavite, an integrated website will be created for the activities they hold, the currently available dogs for adoption, as well as integrating the donation or merchandise details.

The following objectives shall be attained upon the website's completion:

- Create a website for both client and administrator use
- Allow all website users to view animals available for adoption
- Allow all website users to view bank account details for donations
- Allow all website users to view announcements on events and testimonials
- Allow all website users to view SPH location for volunteering or for in-kind donations.
- Allow registered clients to adopt animals and set an appointment for screening process
- Allow registered clients to view days available for volunteering and apply as volunteer
- Allow registered clients to change account details
- Allow website admin to create and manage announcements for clients
- Allow website admin to add, update, or delete animals available for adoption
- Allow website admin to approve appointments set for client screening and for volunteers
- Allow website admin to manage days available for volunteering

III. UN SDGs Addressed

According to the United Nations Sustainable Development Goals, no specific goal pertains to animal welfare, let alone adoption. However, it can be seen that there are multiple goals that can be connected to the security of animal rights and general help to their welfare. These include:

Goal 2: Zero Hunger - aims to improve animal health and welfare, which can lead to increased food security, as healthy and well-cared-for animals are more productive and provide more reliable food sources.

Goal 3: Good Health and Well - aims to ensure the welfare of animals used in food production and research to help prevent the spread of diseases that can affect both animals and humans.

Goal 12: Responsible Consumption and Production - Promoting responsible consumption and production by encouraging pet adoption can help reduce the need for breeding and overproduction of pets.

Goal 15: Life on Land - explicitly addresses the importance of protecting and conserving wildlife, including threatened or endangered animals.

Goal 16: Peace, Justice, and Strong Institutions - Pet adoption can help build humane and ethical animal care policies and practices, as well as promote justice and strong institutions.

Finally, while there is no explicit United Nations Sustainable Development Goal related to animal welfare or adoption, other goals can be associated with animal protection and well-being. Pet adoption websites can be essential in promoting ethical consumption and production, reducing the desire for breeding, and assisting in controlling domestic animal populations. Pet adoption organizations may contribute to sustainable and ethical practices while supporting the well-being of animals and humans by recognizing these UN SDGs, promoting pet adoption, and encouraging responsible pet ownership.

IV. Scope of the Project

This web application consists of user-friendly services focusing on providing help for the community by allowing the admin to post, share and talk about topics and general knowledge in order to proliferate information about events, donation drives and various programs. The web application also shows people how to donate to the cause and see our progress through the announcement page in order to encourage people to donate more. The operations of the web application are only limited within Sweet Pets Haven where the administrators of the web application have the power to input profiles of pets that are up for adoption which the users will be able to view. For the features of the web application, users can view, set an appointment, and see the days that are available for pet volunteering. The admin has the power to edit information about the pets in the adoption house as well as approve and set appointments.

V. Functional/ Non-functional requirements

Name	Requirements
Functional Requirements	
Home Page with Mission and Vision Statements	The website should have a home page that provides an overview of the animal shelter's mission and vision.
Display Available Animals for Adoption	The website should display the animals available for adoption, categorized by cats and dogs.
Donation Page	The website should have a static page in the website for donation purposes wherein it contains bank account information of the animal shelter and other donations for the animal needs and shelter needs that they need.
Announcement Page for Testimonials and Events	The website should have a testimonial page where clients can share their experience with the animal shelter, as well as a page for important announcements and events for the organization.
Adopt and Schedule Appointments	Clients should be able to apply to adopt animals and schedule appointments through the website.
Apply for Volunteer Opportunities	Clients should be able to apply for volunteer opportunities through the website and choose from available slots.
Profile Settings for Clients	Clients should be able to update their profile settings, including their password, email, contact number, and username.

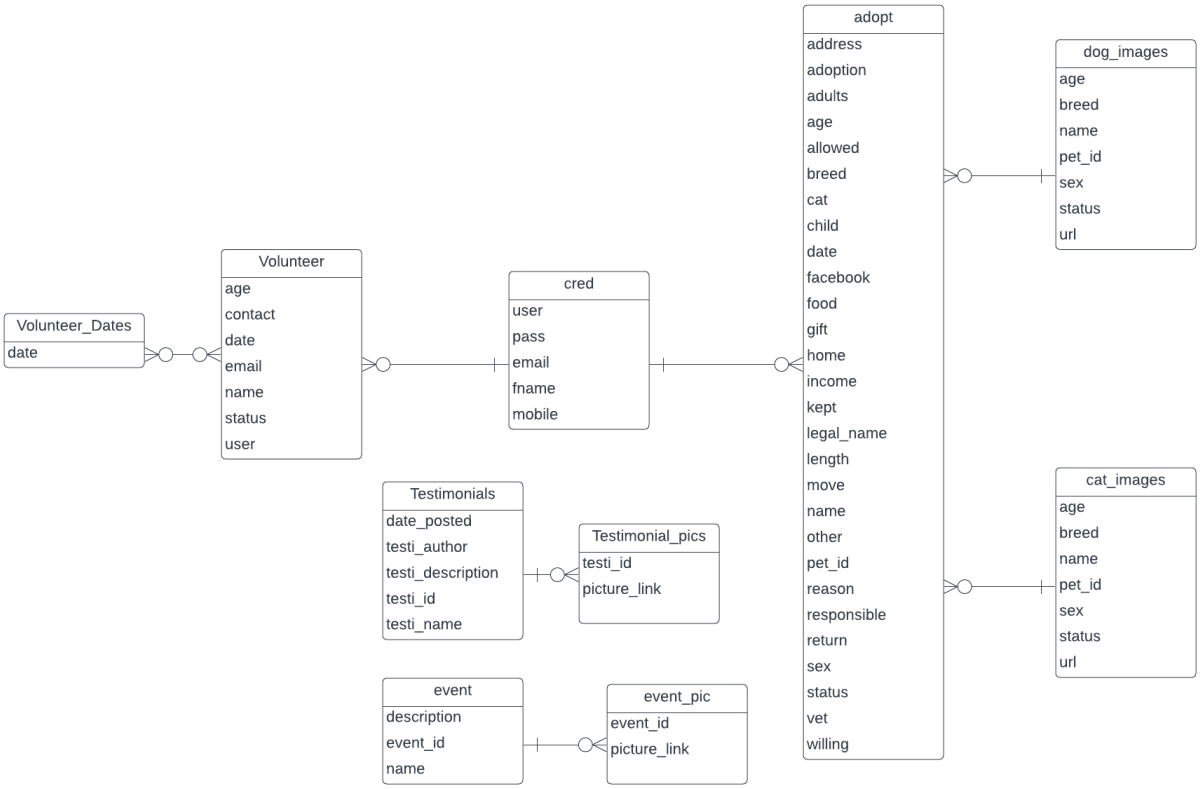

Manage Posts for Admins	Admins should be able to create posts and categorize them to events or testimonials. They can also edit their previous posts and delete.
Add New Animals for Admins	Admins should be able to add new animals to the website.
Update Animal Information for Admins	Admins should be able to update animal information, including whether they are on hold, adopted, or available.
Delete Animal Profiles for Admins	Admins should be able to delete animal profiles.
Manage Appointments for Admins	Admins should be able to approve/deny/pending appointments.
Manage schedule for volunteering for Admins	Admins should have access to add available dates open for volunteering and delete dates once they have reached their desired number of volunteers on that particular date.

Name	Requirements
Non - Functional Requirements Product Requirements	
Usability	The website shall be easy by administrators and clients by implementing GUI principles that can be understood through first time interaction with the system.

	The administrator shall easily manage adoption appointments and volunteer schedules to the client's page, as well as output testimonials and animals up for adoption with ease.
Performance	The website should load quickly, and all functionalities should work seamlessly without any delay.
Compatibility	The website should be compatible with all modern web browsers, including Chrome, Firefox, Safari, and Edge.
Maintainability	The website should be easy to maintain, with clear documentation and a user-friendly content management system.
Mobile responsiveness	The website should be optimized for mobile devices, with a responsive design that adapts to different screen sizes.
Dependability Requirements	
Reliability	Inputting incorrect log-in credentials would alert the user and redirect them to the login page. Authorization process of the administrator should have a 100% match before accessing the feature and the services of the software. Information that is entered by the administrator at any time of day shall be accurately reflected in the public website, particularly both client and admin side.

Availability	The adoption and volunteering services of the system should only be available to authenticated users in the database.
Security Requirements	
Integrity	Information that is deleted or modified by the administrator shall be validated before being committed in the database.
Confidentiality	Password should not be visible at any time
Authentication	Clients must input the right information to successfully log in at the first time. Services that shall deny and approve appointment and schedule, as well as adding animals for adoption shall only be accessible to the administrator side.
External Requirements	
Legislative Requirements	The administrator shall protect the personal information of the clients in accordance to the Data Privacy Act of 2012 The administrator shall ensure the well-being of the pets up for adoption in accordance with Republic Act 10631, otherwise known as the “Animal Welfare Act”.

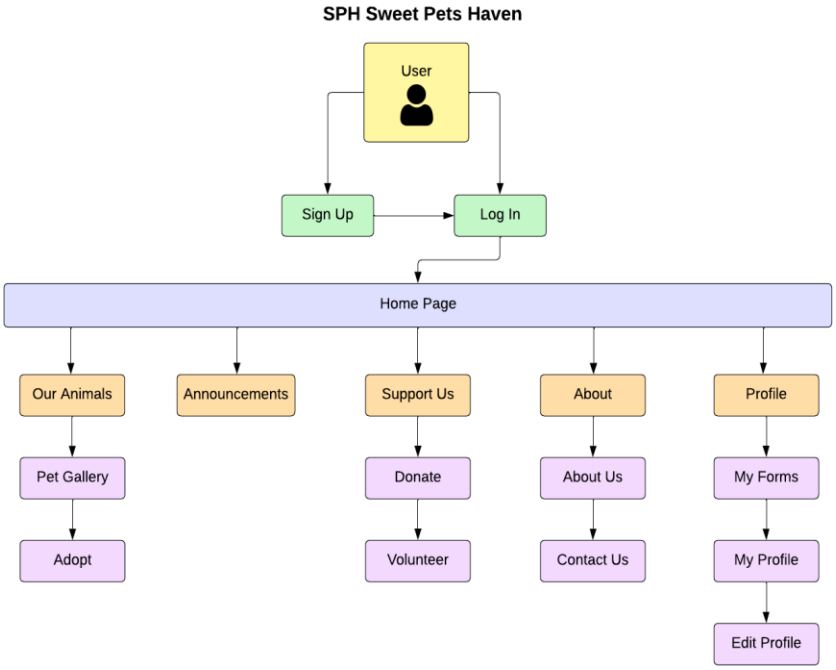

VI. Database design (ERD)

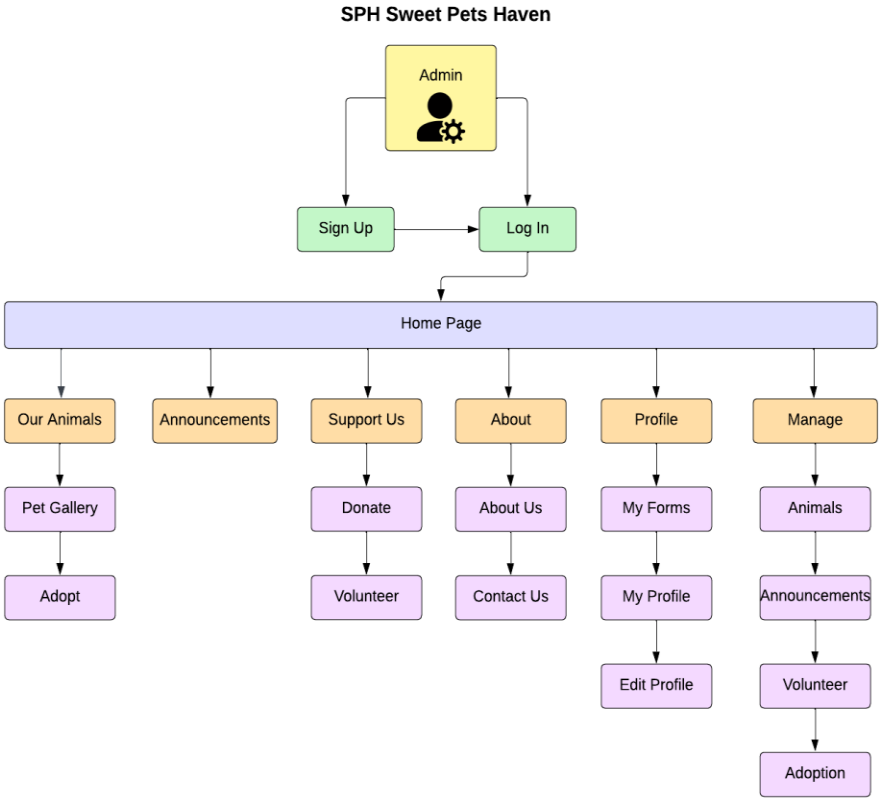

For the database design, we used Google's firebase realtime database to store our site information. Firebase is a cloud based NoSQL database used in many websites and mobile apps. For the design the database contains these different tables/collections: cred, adopt, dog_images, cat_images, volunteer, volunteer_dates, testimonial, testimonial_pics, event, event_pic. The cred collection contains the different credentials for the registered users. The volunteer collection contains the volunteer information connected with the credentials of the user volunteering; each user can be associated with multiple volunteer forms, but each volunteer form is associated with only one user. The volunteer_dates collection contains the different dates that the admin allows volunteers to register to; the dates can be seen in multiple volunteer forms, and many volunteer forms can be associated to different dates. The adopt collection contains the information of the user along with the cat/dog being adopted and the answers of the user to the pet adoption screening form. The dog_images collection contains the information of the pet as well as the url link for the picture of the pet that is uploaded to the firebase storage the pet entries can be associated with many adopt form entries. The cat_images collection is the same as the dog_images collection but for cats. The testimonial collection contains the different information for each testimonial input. The associated testimonial_pics collection contains the testimonial id as well as the url link connected for that testimonial. Multiple pictures are allowed to be connected to one testimonial id. The event collection and the event_id collection is the same as the testimonials collection and testimonial_pic collection but for events instead of testimonials.

VII. Features of the System

A. Sitemap

Sitemap description:

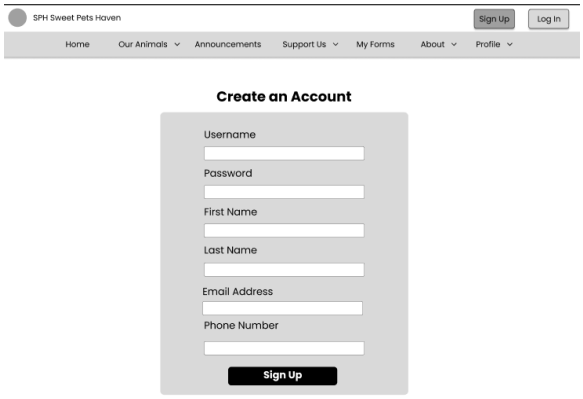

This sitemap serves as a blueprint of the website's structure containing the contents and the list of all the pages. This allows users to navigate the website's content easily and more efficiently. There are two sitemaps shown above, one for the user side and one for the admin side.

The main entry point of the website is the Homepage wherein users can see information about Sweet Pets Haven (SPH) such as the organization's vision and mission. As for the Our Animals page, it includes two web pages namely the Pet Gallery and the Adopt page. The Pet Gallery page displays all the pets for adoption that are categorized into dogs and cats. It contains images of the dogs/cats wherein users can click, thus, redirecting them to a page that contains the information of the selected pet such as the pet ID, name, breed, age, sex, and adoption status. On the Adopt page, it is a pet adoption form that allows the user to set an appointment to apply for adopting their desired pet. The form will ask the user of its basic personal information such as name, email address, and contact number as will the chosen pet's pet ID and pet name. The Announcements page contains posts created by the admin that are categorized into events and testimonials. The Support Us tab includes the Donate and Volunteer page. Donate page consists of the bank accounts wherein users can donate as well other information about animal and shelter needs for the purpose of in-kind donations. On the other hand, the Volunteer page contains information about volunteering, such as how to volunteer and requirements needed in order to volunteer. Once the user decides to apply to be a volunteer, he/she will be redirected to a page that asks the user to fill up a form. The form will ask for personal information about the user such as name, age, email address, contact number, and experience and skills with volunteering as well as the chosen available date from which they would want to volunteer.The About page consists of the About Us page, containing the history of the organization and information about what the organization does, and Contact Us page, containing contact details, social media account and location of the organization. The Profile page enables the user to view their profile that contains the personal information they've entered on the sign up page. It also enables the user to edit their profile details. Under it is the My Forms webpage. It displays all the submitted forms by the user for adoption appointment and volunteer scheduling together with the form information such as date, name of the user, and status of the form. Users can also view the form they've submitted. All website users can access web pages such as the Homepage, Our Animals, Announcements, Support Us, and About, however, registered users will be given the benefit to access the major features of the website such as setting an adoption appointment, applying as a volunteer, viewing submitted forms and editing one's profile.

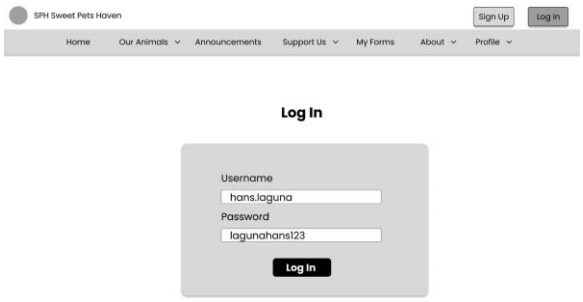

As for the admin side, it has the same navigation links with the registered user, the only difference is there is an additional Manage page. The admin can manage the animals for adoption by adding, updating, or deleting pets. In the Appointments page, admin can view all the submitted pet adoption forms by the user and they are able to approve, deny, or set the status of the request of the user to pending. As for the Volunteers page, similar to the Appointments page, admin can view the submitted application forms of users as a volunteer and perform actions such as approve, deny and pending to the request. Lastly, the Announcement page allows the admin to create posts particularly related to events and testimonials. It allows the admin to set a description for the post and also upload photos. Through providing a sitemap, website owners can ensure that their content is more easily discoverable and accessible to users.

VIII. Communication Letter

March 27, 2023

Sweet Pets Haven (SPH)
Cavite, Philippines

Greetings,

We hope this email finds you well. We are 3rd Year Computer Science Undergraduates from Mapúa University and are interested in partnering with Sweet Pets Haven organization to create a dynamic website for our school project. To elaborate, one of the requirements of our course, particularly Web Systems and Technology 2 Laboratory (IT135-8L), is to create a dynamic website for a non-government organization/community that would aid and help fulfill the community's needs in any way.

Given this, we would personally like to explore and get to know more about the SPH organization such as their mission, vision, and the current challenges being experienced in hopes that our group could come up with an idea that would somehow alleviate existing problems through the development of a dynamic website. With that said, our entire group aims to request your permission to develop an official website for your organization. We thank you and we look forward to hearing from your organization.

Sincerely,

Angelo James Beltran | Jean Isaiah Dava | Tia Julienne Espejo

Hans Laguna | Hanna Katherine Medina | Nikki Esmeralda Rojas

Computer Science Undergraduates from Mapúa University

IX. Acceptance Letter

March 27, 2023

Mapúa University Makati
1191 Pablo Ocampo Sr. Ext, Makati,
Metro Manila, Philippines

Greetings,

Thank you for your email expressing interest in partnering with Sweet Pets Haven organization to create a dynamic website for your school project. We are thrilled to hear that you are keen on collaborating with us to fulfill your academic requirements while making a positive impact on our organization. We appreciate your initiative to learn more about Sweet Pets Haven and our mission and vision. We are dedicated to providing a safe haven for abandoned, neglected, and abused pets, and finding them loving homes. As a non-government organization, we rely on the support of the community to continue our mission and improve the lives of these animals.

After careful consideration, we are pleased to accept your proposal to develop an official website for our organization. Your efforts will undoubtedly aid us in fulfilling our mission and reaching out to more people who are interested in supporting our cause. We welcome the opportunity to work with you and your group and are excited to see the ideas you come up with for the website. We will be happy to provide you with any assistance or information that you may require to complete the project successfully.

Thank you again for considering Sweet Pets Haven as the non-government organization for your project. We look forward to a fruitful collaboration with you and your group.

Sincerely,

Joy B. Acosta
Sweet Pets Haven Organization

X. Test Results

TEST SCRIPT #:	**1**
TITLE:	**Site Availability**
CREATED BY:	**Tia Julienne Espejo**
DATE TESTED:	**April 29, 2023**
PRE-CONDITION:	**Access to browser and Internet**
TEST SCENARIO:	**Verify that the user can access the site through the internet.**

ID#	Description	Steps to Execute	Expected Results	Actual Results	Pass/Fail
TC1	Verify that the user is able to access the site through the internet	1.) Navigate to the website link	Website should open	Website should open	Pass

TEST SCRIPT #:	**2**
TITLE:	**Account Registration**
CREATED BY:	**Angelo Beltran**
DATE TESTED:	**May 1, 2023**
PRE-CONDITION:	**Access to site**
TEST SCENARIO:	**Verify that the user can register an account.**

ID#	Description	Steps to Execute	Expected Results	Actual Results	Pass/Fail
TC1	Verify that the user can access the account registration page	1.) Access the navigation bar 2.) Click the Sign Up button	The user should be directed to the Sign Up page	The Sign Up page opens after clicking the Sign Up button	Pass
TC2	Verify that the user can input a valid first name	1.) Choose the label “First Name” or the text field below it 2.) Enter desired first name	The user should see their input for the first name field	The input is shown within the first name field	Pass
TC3	Verify that the user can input a valid last name	1.) Choose the label “Last Name” or the text field below it 2.) Enter desired last name	The user should see their input for the last name field	The input is shown within the last name field	Pass
TC4	Verify that the user can input a valid username	1.) Choose the label “Username” or the text field below it 2.) Enter desired username	The user should see their input for the username field	The input is shown within the username field	Pass
TC5	Verify that the user can input a valid password	1.) Choose the label “Password” or the text field below it 2.) Enter desired password	The user should see their masked input for the password field	The masked input is shown within the password field	Pass
TC6	Verify that the user can input a valid email	1.) Choose the label “Email” or the text field below it 2.) Enter email address following correct format (username@domain.com)	The user should see their input for the email field	The input is shown within the email field	Pass
TC7	Verify that the user can input a valid mobile number	1.) Choose the label “Mobile Number” or the text field below it 2.) Enter desired 11-digit mobile number	The user should see their input for the mobile number field	The input is shown within the mobile number field	Pass
TC8	Verify that the user can register an account	1.) Fill in all form fields with valid input 2.) Click the “Sign Up” button	The user’s registration must be successful and a new account will be created. The user is redirected to the homepage.	The homepage is opened.	Pass

TC9	**Verify that the user cannot submit an empty form**	**1.) Click the "Sign Up" button**	**The form will prompt that the "First Name" field is required and will not submit**	**The form prompts the user to fill out the "First Name" field**	**Pass**
TC10	**Verify that the user cannot submit with only the first name filled up**	**1.) Enter a valid first name** **2.) Click the "Sign Up" button**	**The form will prompt that the "Last Name" field is required and will not submit**	**The form prompts the user to fill out the "Last Name" field**	**Pass**
TC11	**Verify that the user cannot submit with only the first and last name filled up**	**1.) Enter a valid first name and last name** **2.) Click the "Sign Up" button**	**The form will prompt that the "Username" field is required and will not submit**	**The form prompts the user to fill out the "Username" field**	**Pass**
TC12	**Verify that the user cannot submit with only the first name, last name, and username filled up**	**1.) Enter a valid first name, last name, and username** **2.) Click the "Sign Up" button**	**The form will prompt that the "Password" field is required and will not submit**	**The form prompts the user to fill out the "Password" field**	**Pass**
TC13	**Verify that the user cannot submit with only the first name, last name, username, and password filled up**	**1.) Enter a valid first name, last name, username, and password** **2.) Click the "Sign Up" button**	**The form will prompt that the "Email" field is required and will not submit**	**The form prompts the user to fill out the "Email" field**	**Pass**
TC14	**Verify that the user cannot submit with an email missing an '@'**	**1.) Enter a valid first name, last name, username, and password** **2.) Enter an email without '@'** **3.) Click the "Sign Up" button**	**The form will prompt that an '@' is missing in the input and will not submit**	**The form prompts the user that '@' is missing in the "Email" field**	**Pass**
TC15	**Verify that the user cannot submit with an email with '.' in the wrong position**	**1.) Enter a valid first name, last name, username, and password** **2.) Enter an email with a period directly after the '@'** **3.) Click the "Sign Up" button**	**The form will prompt that the '.' is in the wrong position and will not submit**	**The form prompts the user that '.' is in the wrong position in the "Email" field**	**Pass**
TC16	**Verify that the user cannot submit with only the first name, last name, username,**	**1.) Enter a valid first name, last name, username, password, and email** **2.) Click the "Sign Up" button**	**The form will prompt that the "Mobile Number" field is required and will not submit**	**The form prompts the user to fill out the "Mobile Number" field**	**Pass**

	password, and email filled up				
TC17	**Verify that the user cannot submit with an alphanumeric input in the mobile number field**	**1.) Enter a valid first name, last name, username, password, and email** **2.) Enter a combination of numbers and letters in the mobile number field** **3.) Click the "Sign Up" button**	**A message will appear prompting the user to enter the 11 digits of the phone number**	**The message has appeared for the user**	**Pass**
TC18	**Verify that the user cannot submit with an invalid mobile number**	**1.) Enter a valid first name, last name, username, password, and email** **2.) Enter a number less than or more than 11 digits** **3.) Click the "Sign Up" button**	**A message will appear prompting the user to enter the 11 digits of the phone number**	**The message has appeared for the user**	**Pass**
TC19	**Verify that the user cannot submit with a mobile number that is already registered**	**1.) Enter a valid first name, last name, username, password, and email** **2.) Enter a number which is already used for a registered account** **3.) Click the "Sign Up" button**	**A message will appear informing the user that the mobile number is already registered**	**The message has appeared for the user**	**Pass**
TC20	**Verify that the user cannot submit with an email address that is already registered**	**1.) Enter a valid first name, last name, username, password, and mobile number** **2.) Enter an email which is already used for a registered account** **3.) Click the "Sign Up" button**	**A message will appear informing the user that the email address is already registered**	**The message has appeared for the user**	**Pass**
TC21	**Verify that the user cannot submit with a username that is already registered**	**1.) Enter a valid first name, last name, password, email, and mobile number** **2.) Enter a username which is already used for a registered account** **3.) Click the "Sign Up" button**	**A message will appear informing the user that the username is already registered**	**The message has appeared for the user**	**Pass**

TC22	Verify that the user cannot submit with a last name containing invalid characters	1.) Enter a valid first name, username, password, email, and mobile number 2.) Enter a last name containing characters other than uppercase or lowercase letters and white spaces 3.) Click the “Sign Up” button	A message will appear informing the user that the last name input is invalid	The message has appeared for the user	Pass
TC22	Verify that the user cannot submit with a first name containing invalid characters	1.) Enter a valid last name, username, password, email, and mobile number 2.) Enter a first name containing characters other than uppercase or lowercase letters and white spaces 3.) Click the “Sign Up” button	A message will appear informing the user that the first name input is invalid	The message has appeared for the user	Pass

TEST SCRIPT #:	3
TITLE:	User Login
CREATED BY:	Angelo Beltran
DATE TESTED:	May 1, 2023
PRE-CONDITION:	Access to site and a registered account
TEST SCENARIO:	Verify that the user can login to their registered account.

ID#	Description	Steps to Execute	Expected Results	Actual Results	Pass/Fail
TC1	Verify that the user can access the account login page	1.) Access the navigation bar 2.) Click the Log In button	The user should be directed to the Login page	The Login page opens	Pass

TC2	**Verify that the user can login using a correct username and password**	**1.) Enter a registered username** **2.) Enter the correct password for the username** **3.) Click the Login button**	**The user will be logged in and will return to the homepage**	**The homepage opens and the user is logged in**	**Pass**
TC3	**Verify that the user cannot login using a correct username and incorrect password**	**1.) Enter a registered username** **2.) Enter an incorrect password for the username** **3.) Click the Login button**	**A message appears which says "Account Not Found"**	**The message appears above the login form and the login fails**	**Pass**
TC4	**Verify that the user cannot login using an incorrect username and a password registered for an account**	**1.) Enter an unregistered username** **2.) Enter a password for a registered account** **3.) Click the Login button**	**A message appears which says "Account Not Found"**	**The message appears above the login form and the login fails**	**Pass**
TC5	**Verify that the user cannot login using an incorrect username and password**	**1.) Enter an unregistered username** **2.) Enter an unregistered password** **3.) Click the Login button**	**A message appears which says "Account Not Found"**	**The message appears above the login form and the login fails**	**Pass**
TC6	**Verify that the user cannot submit an empty form/with an unfilled username field**	**1.) Click the Login button**	**The form will prompt that the "Username" field is required and will not submit**	**The form prompts the user to fill out the "Username" field**	**Pass**
TC7	**Verify that the user cannot login with an unfilled password field**	**1.) Enter a username** **2.) Click the Login button**	**The form will prompt that the "Password" field is required and will not submit**	**The form prompts the user to fill out the "Password" field**	**Pass**
TC8	**Verify that the user cannot login using incorrect capitalization of a registered username**	**1.) Enter a registered username but change the capitalization of a/some letter(s)** **2.) Enter the registered password for the account** **3.) Click the Login button**	**A message appears which says "Account Not Found"**	**The message appears above the login form and the login fails**	**Pass**

TC9	Verify that the user cannot login using incorrect capitalization of a registered password	1.) Enter a registered username 2.) Enter the registered password for the account but change the capitalization of a/some letter(s) 3.) Click the Login button	A message appears which says “Account Not Found”	The message appears above the login form and the login fails	Pass

TEST SCRIPT #:	4
TITLE:	Edit Account Information
CREATED BY:	Angelo Beltran
DATE TESTED:	May 1, 2023
PRE-CONDITION:	Access to site and a logged in account
TEST SCENARIO:	Verify that the user can edit their account information

ID#	Description	Steps to Execute	Expected Results	Actual Results	Pass/Fail
TC1	Verify that the user can access the edit account information page	1.) Access the navigation bar 2.) Hover to profile and click Edit Profile button	The user should be directed to the Edit Profile page	The Edit Profile page opens	Pass
TC2	Verify that the user can change their username	1.) Choose the label “Username” or the text field below it 2.) Enter desired new username 3.) Click the Update Account button	The account information will be updated and the user will be redirected to the homepage	The homepage opens after the account information has been updated	Pass
TC3	Verify that the user cannot submit an empty username	1.) Remove the value set for the “Username” field 2.) Click the Update Account button	The form will prompt that the “Username” field is required and will not submit	The form prompts the user to fill out the “Username” field	Pass

TC4	**Verify that the user can change their password**	**1.) Choose the label "Password" or the text field below it** **2.) Enter desired new password** **3.) Click the Update Account button**	**The account information will be updated and the user will be redirected to the homepage**	**The homepage opens after the account information has been updated**	**Pass**
TC5	**Verify that the user cannot submit an empty password**	**1.) Remove the value set for the "Password" field** **2.) Click the Update Account button**	**The form will prompt that the "Password" field is required and will not submit**	**The form prompts the user to fill out the "Password" field**	**Pass**
TC6	**Verify that the user can change their first name**	**1.) Choose the label "First Name" or the text field below it** **2.) Enter desired new first name** **3.) Click the Update Account button**	**The account information will be updated and the user will be redirected to the homepage**	**The homepage opens after the account information has been updated**	**Pass**
TC7	**Verify that the user cannot submit an empty first name**	**1.) Remove the value set for the "First Name" field** **2.) Click the Update Account button**	**The form will prompt that the "First Name" field is required and will not submit**	**The form prompts the user to fill out the "First Name" field**	**Pass**
TC8	**Verify that the user can change their last name**	**1.) Choose the label "Last Name" or the text field below it** **2.) Enter desired new last name** **3.) Click the Update Account button**	**The account information will be updated and the user will be redirected to the homepage**	**The homepage opens after the account information has been updated**	**Pass**
TC9	**Verify that the user cannot submit an empty last name**	**1.) Remove the value set for the "Last Name" field** **2.) Click the Update Account button**	**The form will prompt that the "Last Name" field is required and will not submit**	**The form prompts the user to fill out the "Last Name" field**	**Pass**
TC10	**Verify that the user can change their email address**	**1.) Choose the label "Email" or the text field below it** **2.) Enter desired new email following correct format** **3.) Click the Update Account button**	**The account information will be updated and the user will be redirected to the homepage**	**The homepage opens after the account information has been updated**	**Pass**

IX. Screenshots of the functions of system (with description)

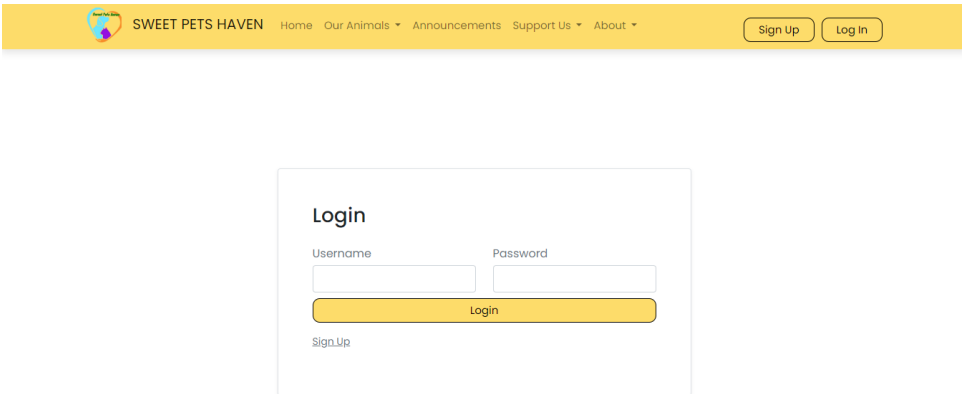

❖ Sign Up Page

The sign-up page is a web page that allows users to create a new account for a website or application. The sign-up page is the first step in onboarding new users and collecting information necessary for creating their account. It includes a form to enter user information. This form includes fields for the user's first name, last name, username, password, email address, and mobile number. The "Sign Up" button is used to submit the user's information and create their account.

❖ Login Page

The Login page is a web page where users can enter their credentials, such as username and password, to gain access to the main features of the website. It has a username field and a password field where users enter their username and password associated with their account. The “Login" button is used to submit the login credentials and authenticate the user.

❖ Home Page

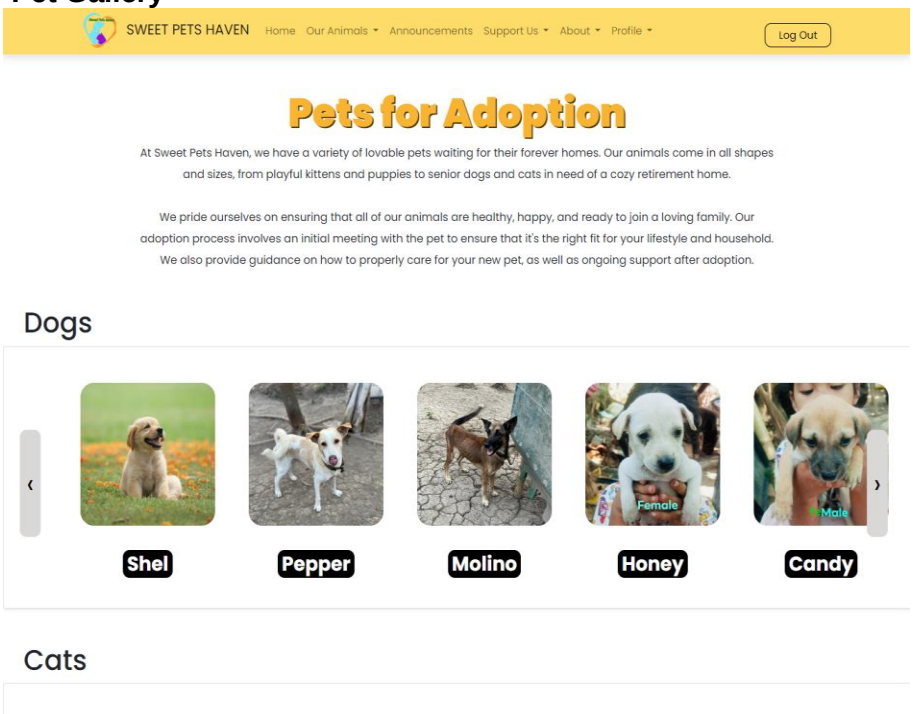

The Home page is the main page of a website that serves as a gateway to the rest of the site's content. It is the first page that users see when they visit a website and is designed to provide an overview of the site's purpose and content. It contains a header that includes the website's logo and a navigation menu. Moreover, the organization’s vision and mission can also be seen here.

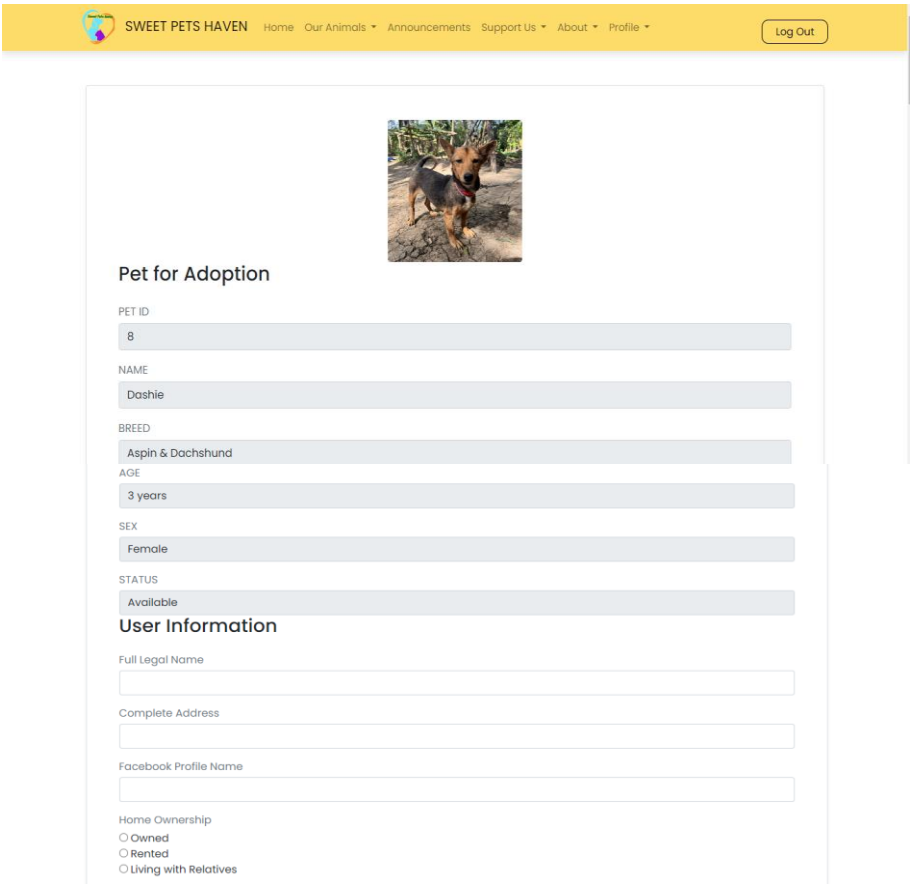

❖ Our Animals

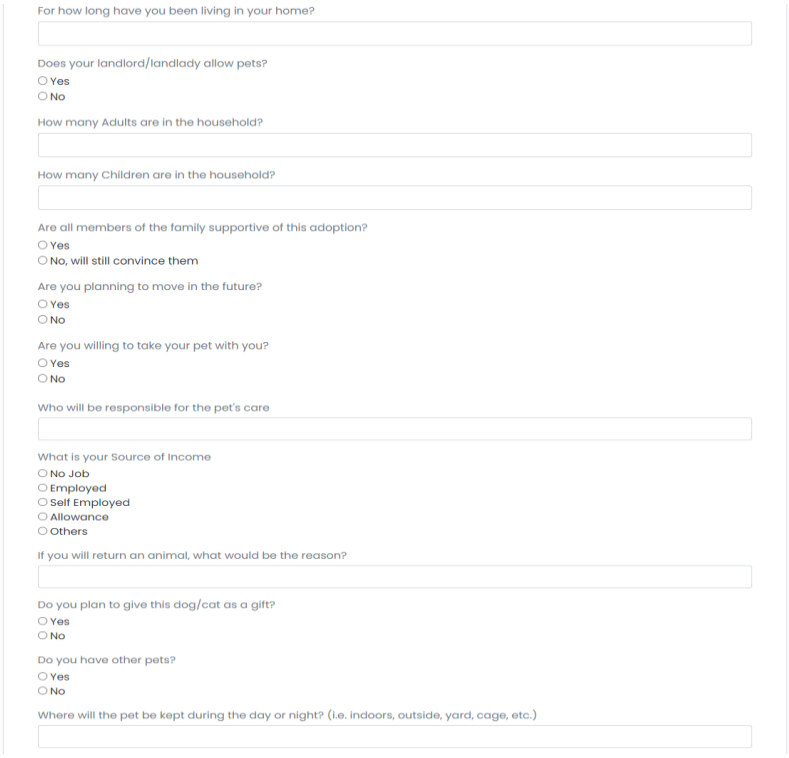

The Our Animals page contains an overview of their advocacy regarding pets for adoption in Sweet Pets Haven. It also consists of a gallery of the pets, particularly dogs and cats, that is available for adoption. The user can click the left and right arrow buttons to see other pet pictures. Moreover, the website has a feature of applying for an adoption appointment. Through hovering the user’s mouse on the pet image, an “Adopt Me” message will appear and by clicking it, the user will then be directed to the Pet Adoption Form page that includes information regarding the desired pet for adoption. The purpose of this form is to collect information from potential adopters who are interested in adopting a pet. The purpose of the form is to help the agency determine if the adopter is a good match for the pet and ensure that the pet will be going to a safe and caring home.

➢ Pet Gallery

➢ Pet Adoption Form

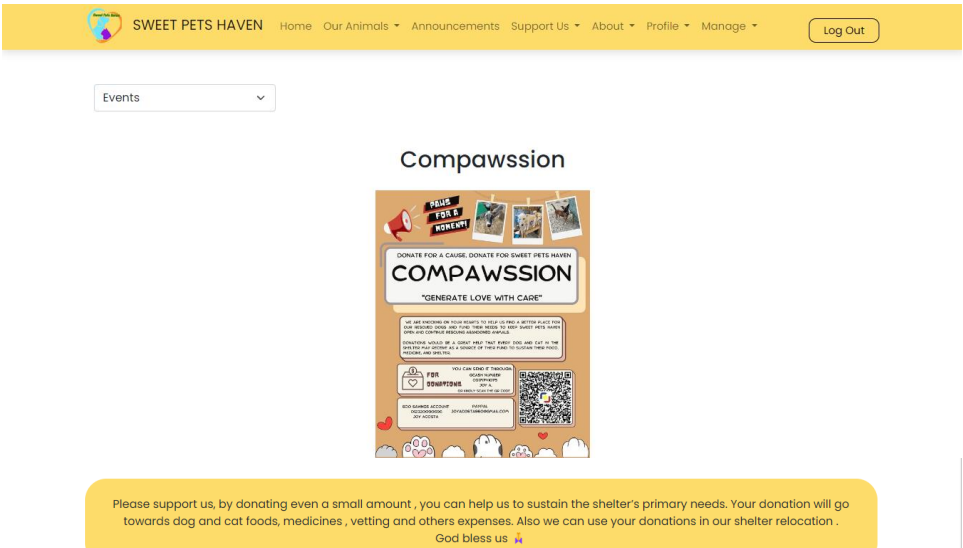

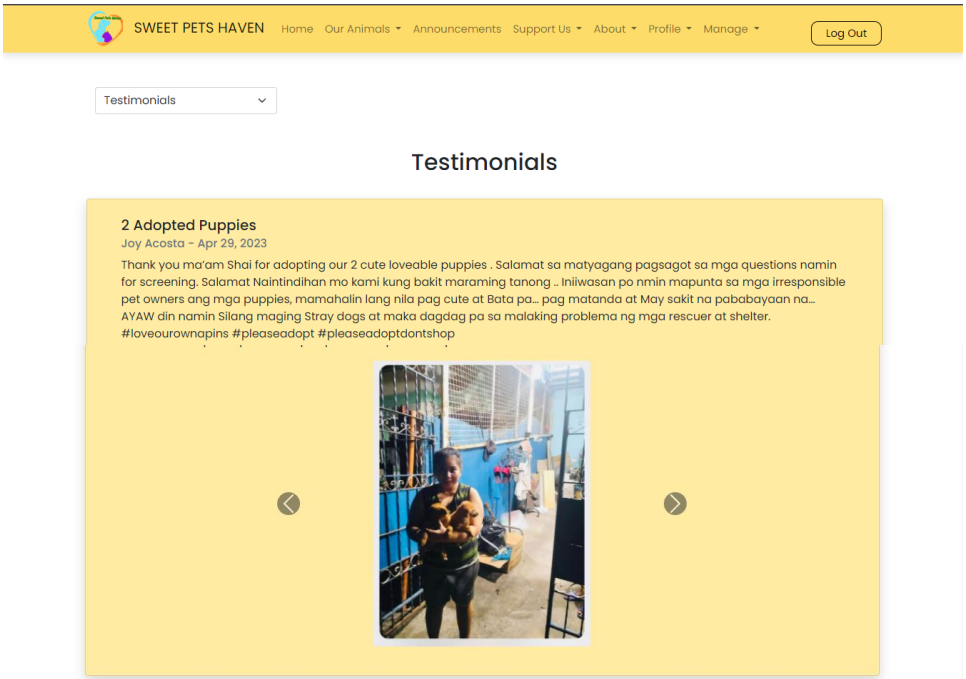

❖ Announcements

The Announcements page provides a platform for the animal shelter to share important news and updates with visitors. This can include information on upcoming events, recent success stories, testimonials and other relevant news. Users can choose to view events of the organization and testimonials of adopters. For events post, it contains an event title, description, and image/s. As for testimonials post, it contains a testimonial title, author, description, and images as well. By regularly updating the announcements page with events and testimonials, the animal shelter can build trust and credibility with visitors. This can help to establish the animal shelter as a reputable organization that is dedicated to improving the lives of animals in the community.

➢ **Events**

➢ **Testimonials**

❖ **Support Us**

The Support Us page offers various options for users to contribute to Sweet Pets Haven. It is divided into three main sections: Donate, Volunteer, and Volunteer Form.

The Donate section provides a secure and simple way for users to make financial contributions to SPH. The page is designed to be user-friendly and straightforward, enabling users to donate using credit or debit cards, PayPal, or GCash. A QR code is also available for easy donations through GCash. In addition, the page features a "Donate in Kind" section that lists the items that can be donated for animal and shelter needs.

The Volunteer section details the different ways users can volunteer with SPH. This section provides information on volunteer opportunities, including assisting with events, and working at the shelter. Users can also find information on how to become a volunteer and the requirements for volunteering.

The Volunteer Form section contains a form for users to fill out if they are interested in volunteering. The form collects the user's name, contact information, and availability. Once the form is submitted, the SPH volunteer coordinator will contact the user to discuss further details.

➢ **Donate**

➢ Volunteer

Let us help those who can't help themselves.

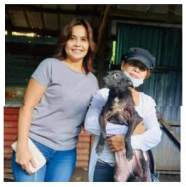

JOIN OUR GROWING VOLUNTEER PROGRAM

Are you an animal lover looking for a meaningful way to give back to your community?
Do you want to experience being a volunteer in an animal shelter and to experience taking care of rescued cats & dogs in just a short period of time?

Consider volunteering at our local animal shelter, **Sweet Pets Haven!**

😽 Help Us So That We Can Help Them 🐶

Some of the tasks you may be involved in include:

- Walking dogs and providing them with exercise and attention
- Playing with cats and providing them with love and affection
- Cleaning cages and enclosures to ensure a safe and healthy environment for our animals
- Assisting with feeding and watering our animals
- Helping with adoption process and promoting our animals to potential adopters
- Providing general support to our staff and other volunteers

Join our paw-some team and make a furry difference! 🐾

No prior experience is necessary - we will provide you with all the training and support you need to succeed in your role. All we ask is that you are reliable, committed, and passionate about animal welfare.

Volunteering at our animal shelter is not only a rewarding way to help animals in need, but it's also a great way to meet like-minded people and make new friends. Plus, you'll get plenty of snuggles and kisses from our furry friends!

How to become a Volunteer

❶ APPLY ONLINE
❷ ATTEND A VOLUNTEER ORIENTATION
❸ BEGIN VOLUNTEERING

Apply Now!

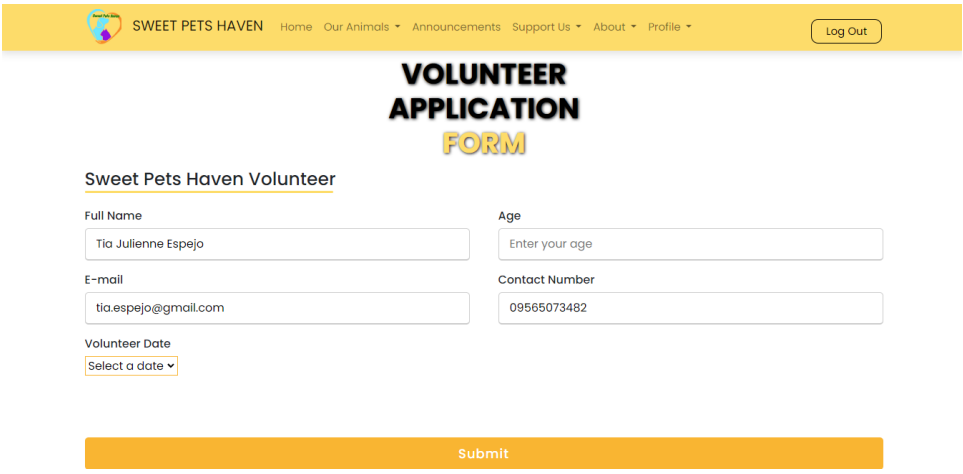

If you're interested in volunteering, please visit our website or stop by the shelter to fill out an application.
We can't wait to have you on our team!

For more information about volunteering, contact us at

joyacosta@gmail.com

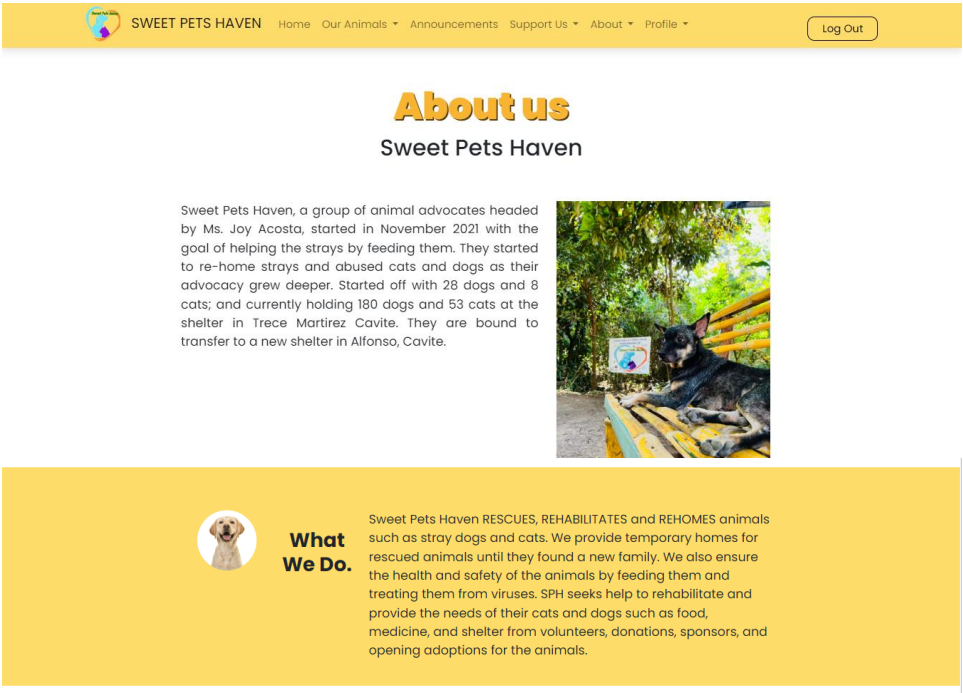

➢ **Volunteer Form**

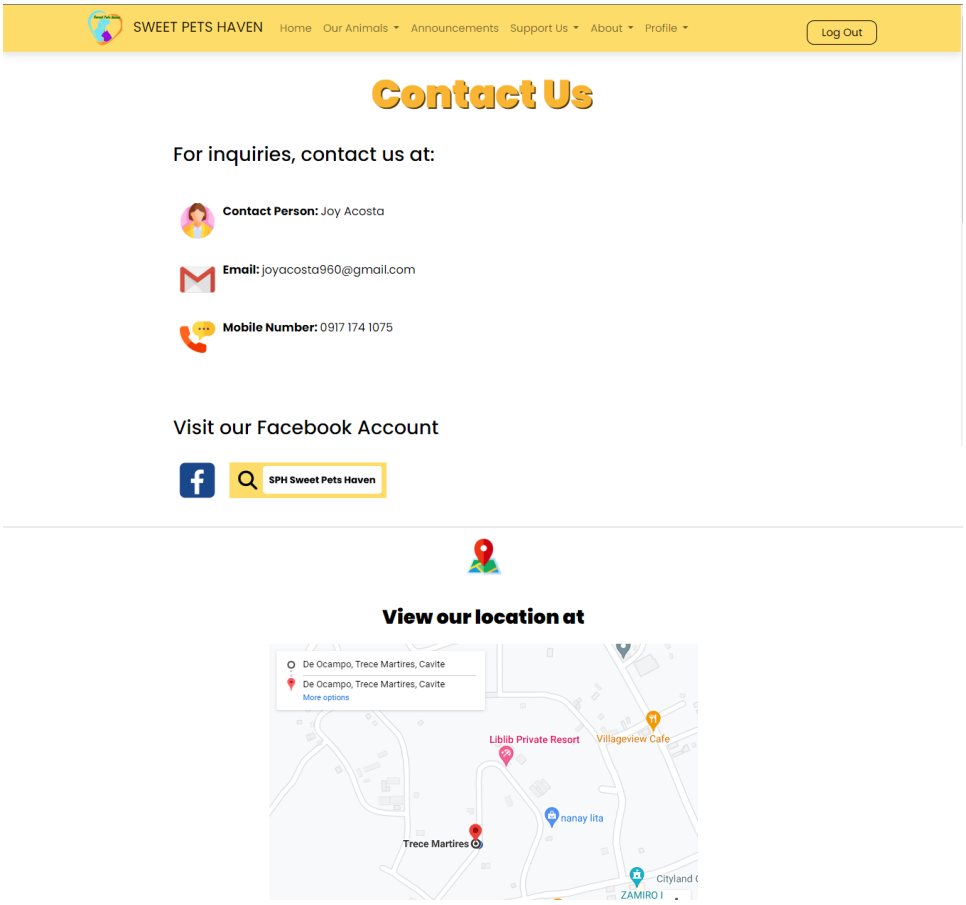

❖ **About**

The “About Us" page and a "Contact Us" page are two important pages on a website that provide visitors with key information about a company or organization. The About Us page contains a brief overview of how the Sweet Pets Haven was founded and its growth over time. The organization’s description of their services and advocacy can also be seen below. On the Contact Us page, it includes the contact person, email address and phone number where users can reach the animal shelter with any questions or comments. It also includes a social media link, specifically Facebook, where users can engage with the Sweet Pets Haven’s community and get updates on events, adoptions, and other news. Lastly, Sweet Pets Haven’s physical location can be seen here, including an embedded map.

➢ **About Us**

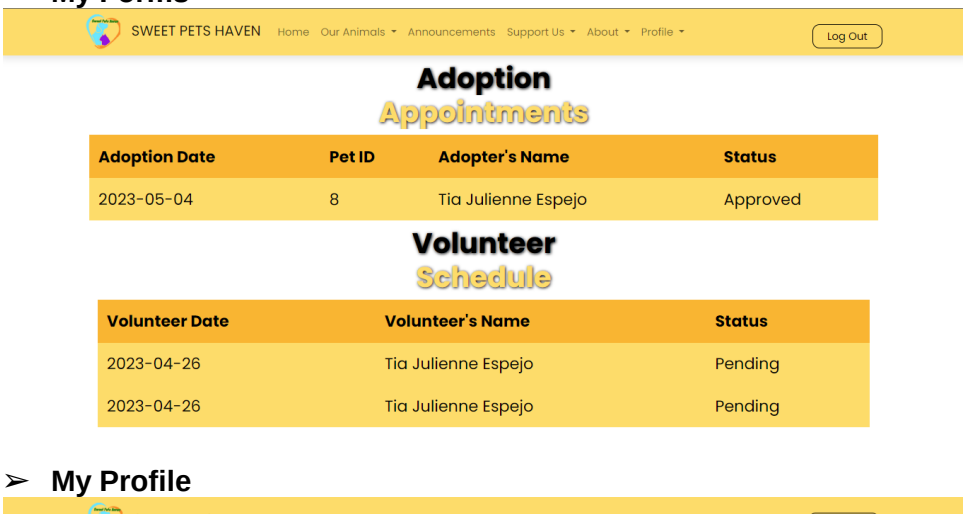

➢ **Contact Us**

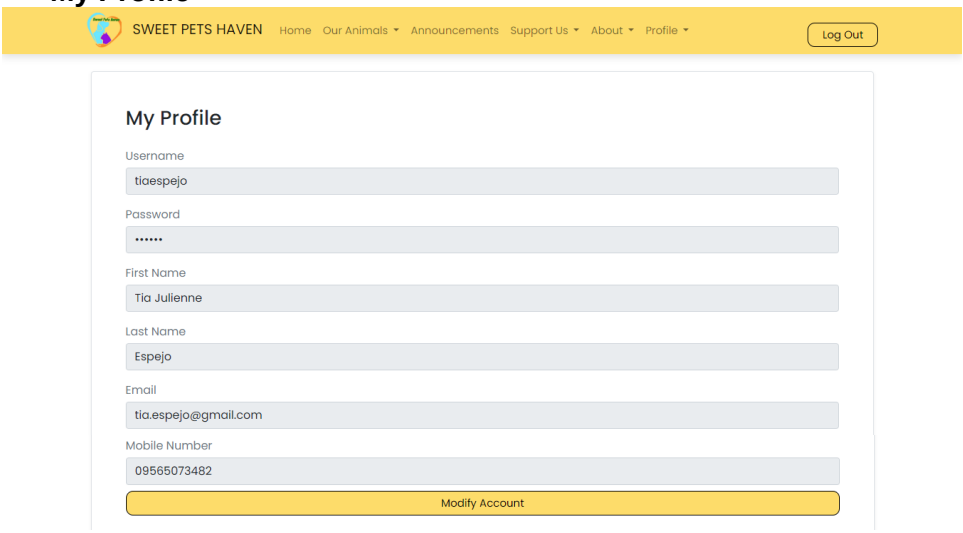

❖ **Profile**

The profile page displays the user's personal information, including their first and last name, mobile number, and username. The page also shows the pet adoption date and ID, which is used to identify the pet's profile, as well as the adopter's name and adoption status. Users can view their volunteer schedule in the volunteer section, which lists their volunteer date, name, and status. The "my profile" page allows users to view and edit their personal information by clicking the "modify account" button. Users can change their username, password, first and last name, and mobile number. However, the email address cannot be modified.

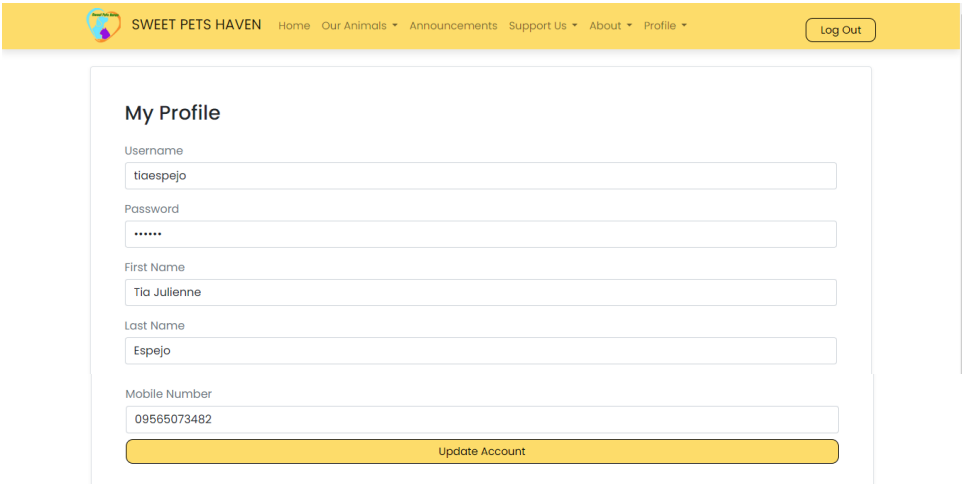

➢ My Forms

➢ My Profile

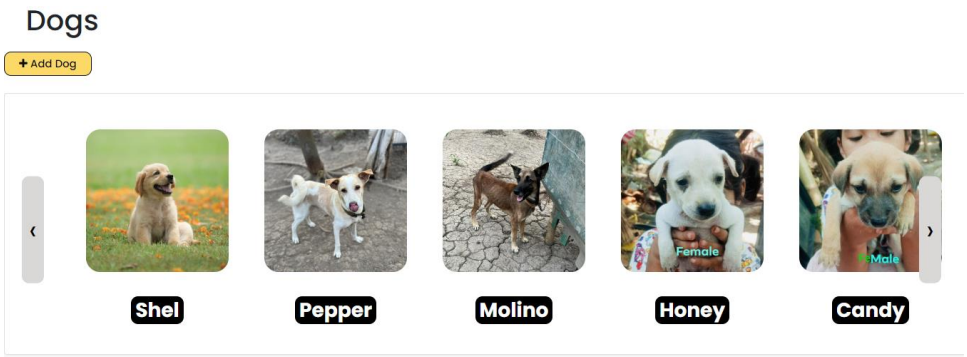

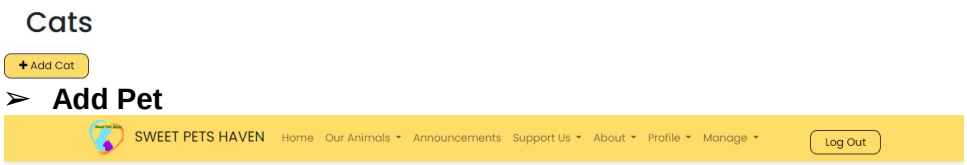

➢ Edit Profile

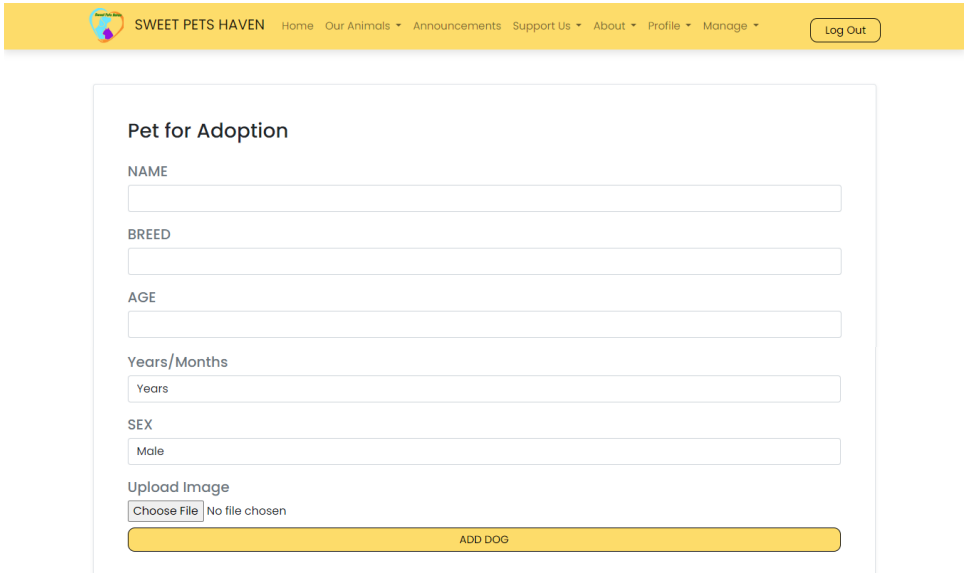

❖ Manage Animals (Admin)

The Manage Animal page, accessible only to admins, allows them to upload images of animals along with their basic information such as name, gender, age (in months or years), and breed. Admins can add, edit, and delete animal profiles through this page. The system automatically generates animal IDs, and admins can edit the basic information, such as name, gender, and breed associated with these IDs. In addition, they can update the animal's profile as needed, such as when they get adopted.

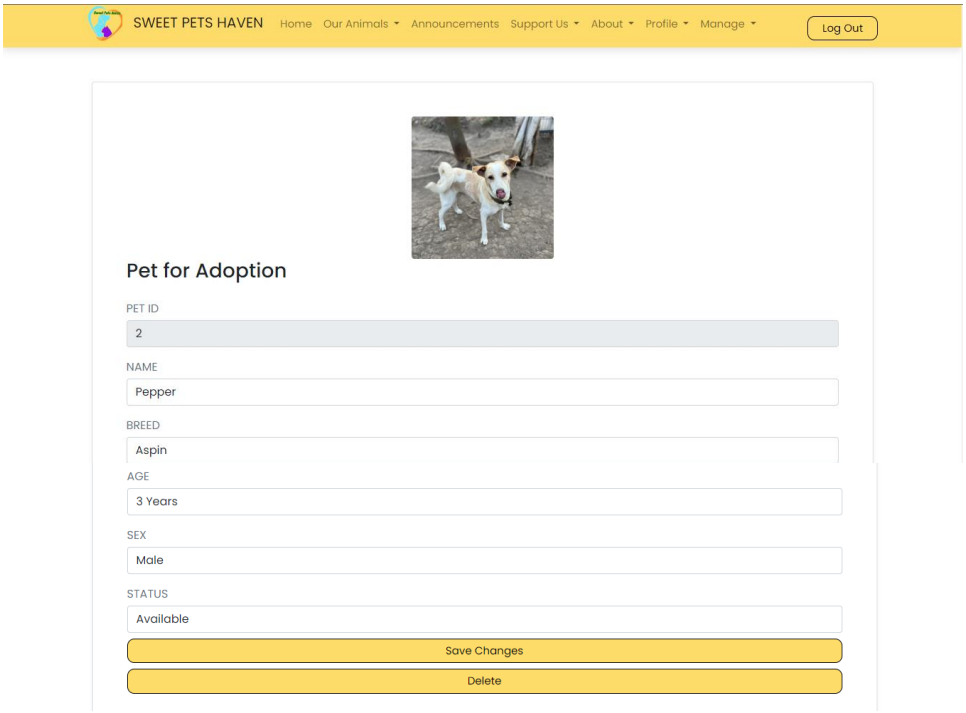

➢ **Add Pet**

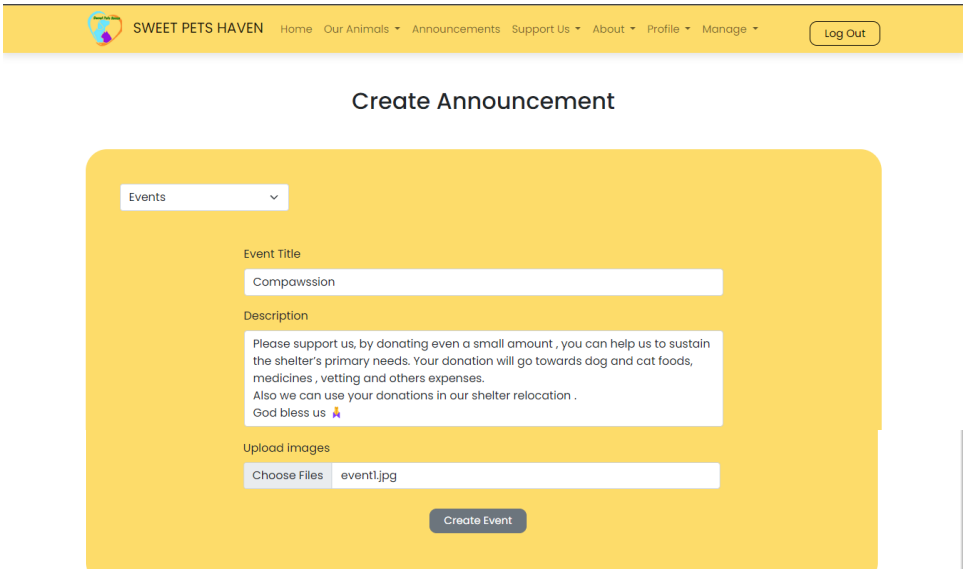

➢ **Edit Pet**

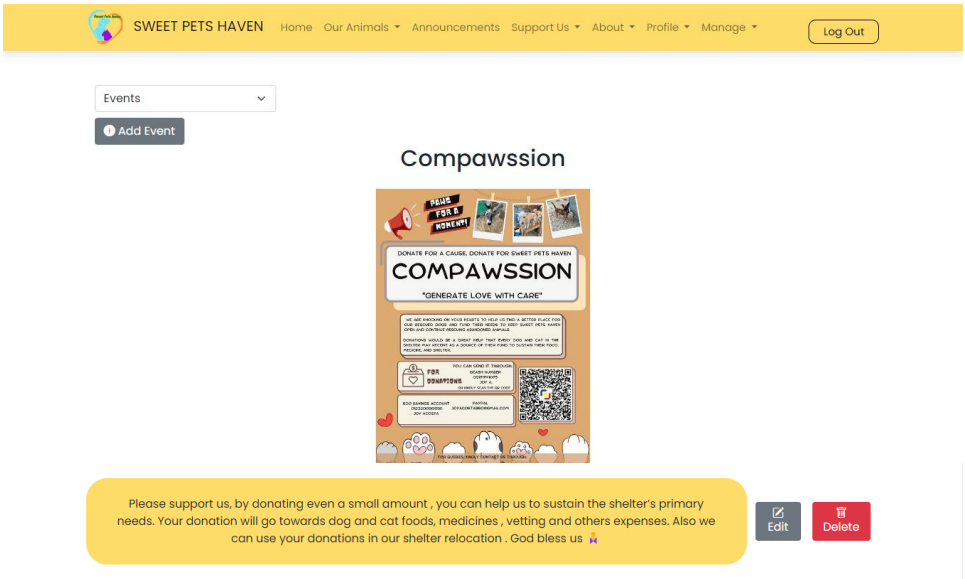

❖ **Manage Announcements (Admin)**

On manage announcements from admin control, it is a platform that can be used to produce and edit announcements for events and add testimonials with message and pictures attached. An admin can create an announcement, for example, events and add an event title. The description is up to the discretion of the admin and the admin can attach an image below. It can also be edited or deleted whenever the admin wants. The testimonial page is structured the same as how the event page is structured except it has an author text box that can be inputted below the title. As with events, image files can be attached.

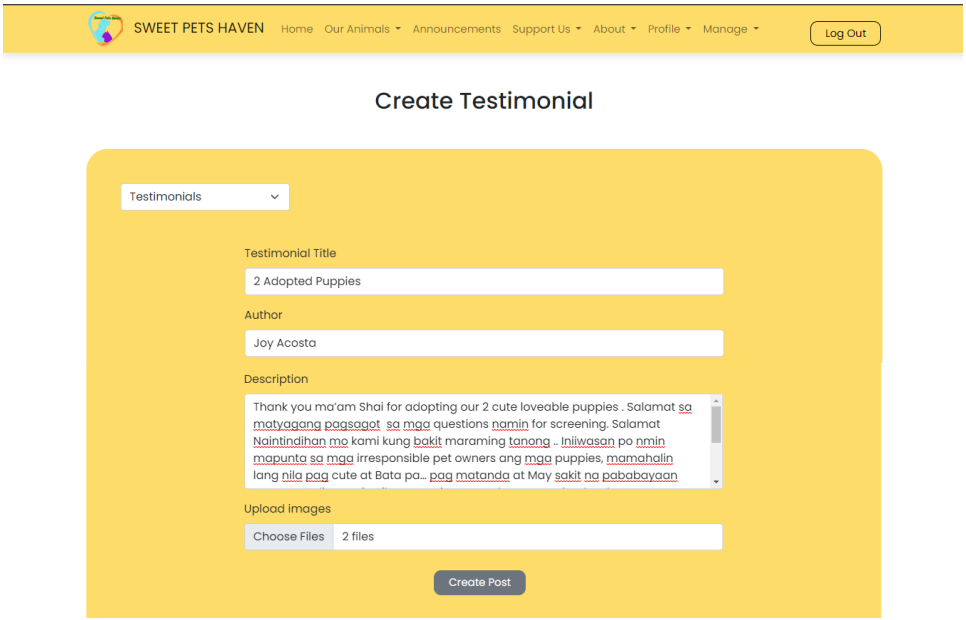

➢ **Create Event**

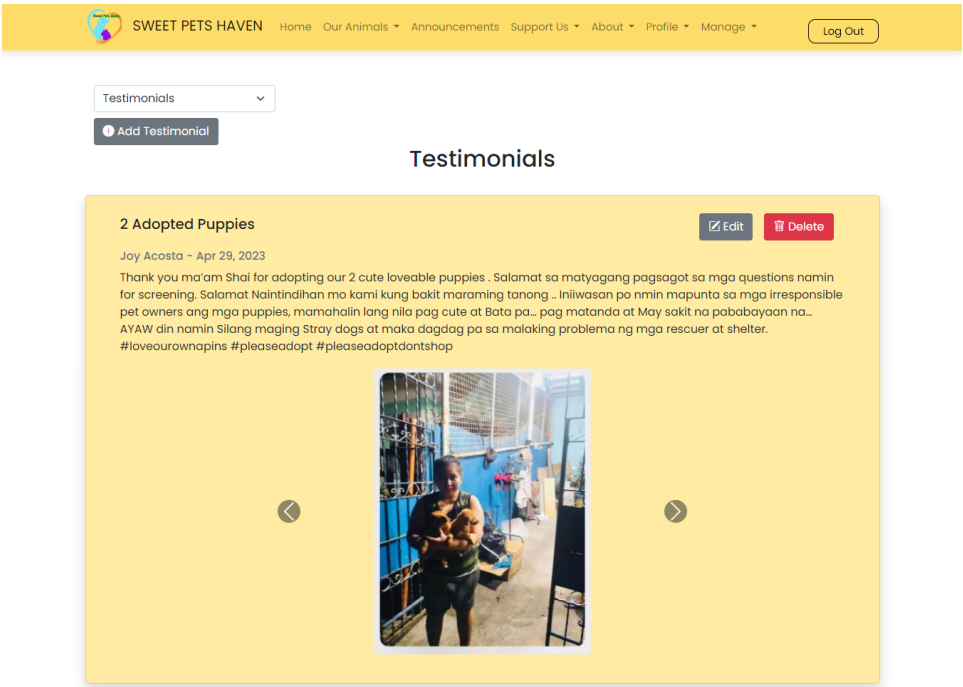

➢ View Event

➢ Create Testimonial

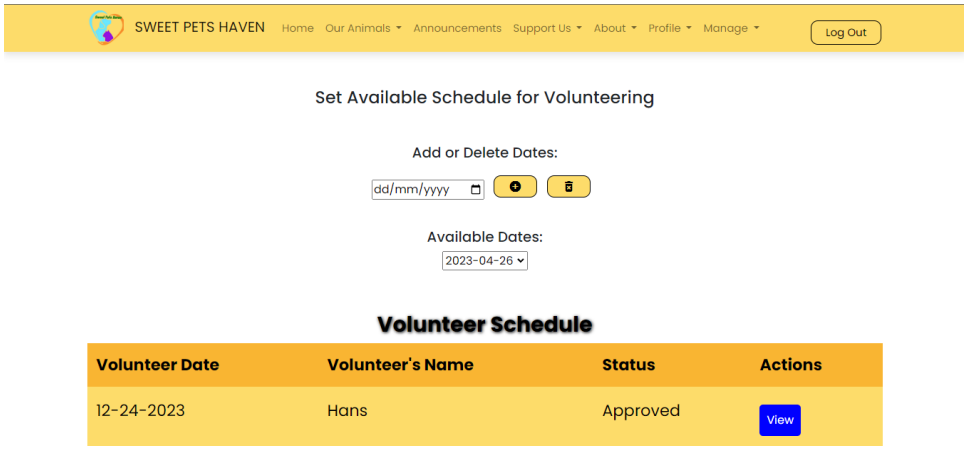

➢ View Testimonial

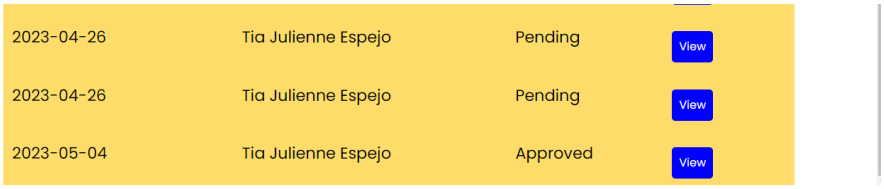

❖ Manage Volunteers (Admin)

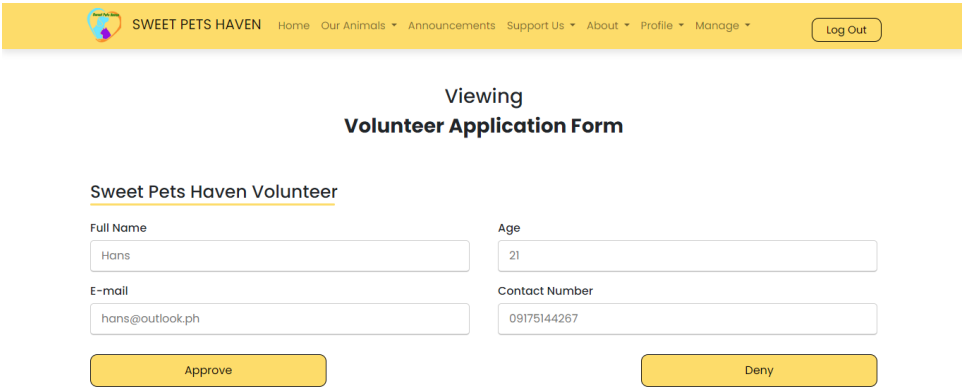

The Manage Volunteer page is an essential tool for admins to keep track of volunteer schedules and applications. Through this page, admins can set a schedule for volunteers and view applicants sorted by date. The admin can also remove or add potential volunteers as needed. The volunteer's information is displayed on the page, including their name, application date, and status. The action button allows the admin to view what can be done for each applicant. When viewing or managing an applicant's profile, the admin can see their name, email, age, and contact number. The admin can approve or deny applicants' entry based on their qualifications and availability.

➢ Set Schedule for Volunteering & View List of Volunteer Applications

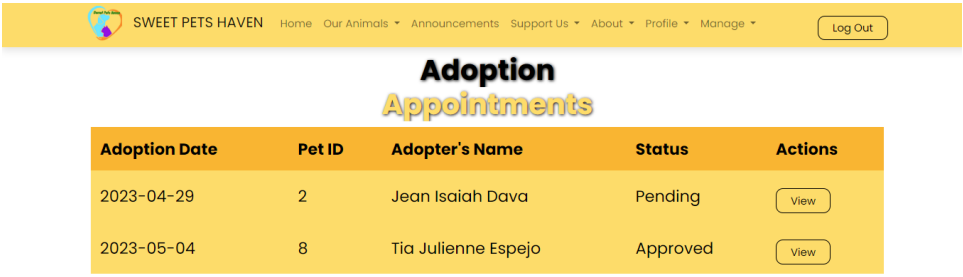

➢ **View & Manage Volunteer Application Form of User**

❖ **Manage Adoption (Admin)**

The Adoption page grants admins the same level of access as the Volunteer page, enabling them to view, approve or deny adoption applications. However, the adoption profile requires much more specific information, such as the applicant's address, plans for the pet, and a questionnaire to determine their suitability to adopt a pet. When reviewing an adoption application, the admin can approve or deny the applicant based on the information provided.

➢ **View List of Submitted Adoption Appointments of Users**
