I. Introduction

The COVID-19 pandemic instigated change in the entire nation, especially as it halted and altered numerous operations in the Philippines. Furthermore, regular processes that involved going to work everyday or attending face to face academic classes had to be administered in an online manner to enable any affected individuals to continue with their pre-pandemic lives despite being stuck at home. Although professionals were capable of purchasing personal devices to use at home and for work, many Filipino students were not as privileged with a capability. According to an article by Flores (2021), the use of devices for distance learning is positively correlated with the educational attainment of a household head, implying that the ability to purchase distance learning devices is dependent on a household head's educational attainment. Unfortunately for most impoverished families in the Philippines, most Filipino household heads' highest educational attainment is only some elementary education. According to the survey by the Social Weather Stations (SWS), only 35% of household heads with some elementary education are capable of purchasing distance learning devices. Evidently, the situation of the pandemic only benefits the privileged middle class, as opposed to members of the lower class.

To mitigate the situation of the latter, the Tech for Filipino Youth Organization (TFYO) was founded by Aldrin Licayan, a Filipino nurse based in Ireland, to raise awareness on the imbalance of educational opportunities for Filipino youth by donating available technologies to the less fortunate. The non-profit organization fulfills this objective by collecting the necessary resources through a GoFundme page to provide devices to students who do not have the means to engage in distance learning. Additionally, these resources are acquired through creative efforts like benefit

concerts, campaign videos, and continuous discussions on the COVID-19 situation, all of which are made possible by Mr. Licayan and his Filipino colleagues who also support the advocacy of TFYO.

The organization also opens its community to anyone who is willing to dedicate their time and expertise to create programs and fundraising campaigns that will contribute to the organization's cause. These individuals could become volunteers who would help the organization in projects or campaigns that best suit their field of expertise. Moreover, the receiving end of these efforts are the beneficiaries, which are communities who have applied to receive aid from the organization.

In conclusion, Tech for Filipino Youth Organization is a non-proft organization that aims to raise awareness on the imbalance of educational opportunities for impoverished Filipino youth by providing them with tools that will allow them to learn and study at home. The advocacy of the organization is one that is shared by this project's team of developers who aspire to create an efficient means to fulfill and maintain the cause that continues to provide Tech for Filipino Youth.

II. Problem Statement & Objectives

The team aims to provide a platform that will contribute in establishing and growing the organization and extending its reach. Specifically, the team aims to answer the following questions:

1) How could the organization establish enough credibility to acquire sponsors and volunteers to support its advocacy?
2) How could the organization manage and store their data for present and future use?

3) What medium could the administrators utilize to manage tasks efficiently?

The primary objective of the team is to develop a website to increase Tech for Filipino Youth Organization's visibility. Specifically, we intend to do the following:

1) Promote transparency and trust to the public to gain sponsors and volunteers by providing a website that keeps them updated on the organization's upcoming events, activities, and latest announcements.
2) Promote data organization by integrating forms in the website for beneficiary/volunteer applications and inquiries, which sends all information to a database upon submission.
3) Promote efficient task management by providing a website that integrates administrator functionalities such as viewing, approving, and declining beneficiary and volunteer applicants.

III. UN SDGs Addressed

SDG #4 - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Due to the pandemic, the learning modality has shifted online, which compromised the learning and well-being of the children. Such a shift established a digital divide in the Philippines as access to education now requires online learning technologies. Last March 2021, it was reported that four (4) out of 10 Filipino students lack distance learning technology. This shows that some students are left behind due to the lack of technological investments for education in the country. Furthermore, gaps

between various socioeconomic groups have widened as educational inequity now extends to having an option with the learning modality. In October 2022, a news article published by ABS-CBN news revealed that private schools may continue implementing three options: 5 days of in-person classes, blended learning, and full distance learning.

On the other hand, public schools were expected to have transitioned to 5-day in-person classes based on the latest order of the Department of Education. The difference in options between the two illustrates how education in the Philippines becomes more of a privilege than a human right. As such, Tech for Filipino Youth Organization (TFYO) aims to provide tablets to children to help resolve educational disparities reported in the 2022 Sustainable Development Goals Report. Based on the report, location and socioeconomic status were significant factors in determining the education participation of the people. It was found that children living in rural areas and the poorest households are consistently more disadvantaged in educational participation and outcomes than their urban, wealthier peers.

As TFYO envisions all Filipino Youth to have an equal opportunity in accessing online education, it is clear that it works toward achieving Sustainable Development Goal #4, which advocates for Quality education. Hence, all of its activities are dedicated to providing online technologies. In addition, its efforts extend to providing education to the underprivileged by conducting free lessons and camps.

IV. Scope of the Project

The team aims to develop the following for the client:

- Website Design: Includes the layout, color scheme, typography, and overall look and feel of the website.
- Front-end Development: Includes the user interface and interactive features of the website.
- Back-end Development: Includes the server-side logic and database integration to the website.
- Testing: Includes testing the website's overall functionality, usability, and performance.
- Documentation: Includes the project overview, site structure, site map, wireframe, design elements used, content to be used, technical details about the programming languages used or any frameworks that has been used, and how the website has been tested.

The team would not be responsible for the deployment, maintenance, and further development of the website. Vue.js would be used as the framework in creating the website, and firebase would be used as the database.

V. Functional requirements

Name	Description
Navigation Bar	The navigation bar shall display the organization's email. It shall display social media icons that redirect the users to TFYO's Facebook, Instagram, and Youtube accounts. It shall also display a logo and navigation tabs that redirect users to any of the following pages: ● Home ● About Us ● Testimonials ● Ask Us It shall display a Join Us dropdown menu button that redirects users to the Beneficiary Form or Volunteer Form. It shall display a Donate button that redirects user to the Donate page. Clicking on the logo in the navigation bar shall redirect the user to the about us page
Footer	The footer shall display a contact us banner that displays the logo, call to action, and contact us button that redirects users to the Ask Us page. It shall display navigation links that redirects users to the any of the following pages: ● Home ● About Us ● Testimonials ● Donate It shall display social media icons that redirect the users to TFYO's Facebook, Instagram, and Youtube accounts. It shall display an Admin Log In link that redirects TFYO administrators to the admin log in page. Clicking on the logo of the organization scrolls the window to the top of the page.

	It shall display the “All rights reserved” notice and a footer image.
View Photo Gallery	The home page of the website shall display a slider/carousel containing images of featured events.
View introduction banner	Under the photo gallery, the home page shall display a section that contains a general description of TFYO’s activities and individual images with titles of the organization’s three (3) main activities: ● Gift giving ● Camps/Lesson ● Fundraising Activities
View Featured Timeline	The home page of the website shall have an timeline section that displays the following information: ● A general reminder for the public regarding the organization’s timeline. ● Three (3) timeline cards with the date and detailed description of the latest timeline update. ● A *View TFYO timeline* button which shall redirect the user to the TFYO Timeline page.
View TFYO Timeline	The site shall display all timeline cards that contain the date and detailed description of the TFYO event or activity in reverse chronological order.
View Events	The home page of the site shall display event cards for the upcoming events such as but not limited to the following: ● Dance lessons ● Voice lessons ● Guitar lessons ● Coding lessons ● Calligraphy lessons ● Cooking lessons Upon clicking each event card, the site shall display a popup modal box that contains the time, host, platform, and short description of the event. The modal box shall have a *join here* that redirects the user to the event registration form.

	The modal box shall have a *back button* that redirects the user back to the home page. If there is no upcoming event, the upcoming events should not be visible in the homepage.
Join Events	Upon clicking the *Join here* button from a selected event card, the user shall be redirected to the event registration form, which requires the following information: ● Full name ● Email address ● Contact Number ● Category The system shall display an alert message and send all user information from the form to the database upon clicking the *Register* button. If there are no upcoming event cards, the whole view join events section shall not be displayed. After registration, the user shall redirected to the home page.
View Volunteer Opportunities	The home page of the site shall display announcement cards for volunteer application. Each card shall have a *learn more* button that opens a popup modal upon clicking it. The event details modal shall display the following information: ● Volunteer Title ● Schedule of Event ● Platform ● Event Description The event details modal shall also display a *sign up* button that redirects users to the volunteer application form. If there are no announcement cards, the whole view volunteer opportunities section shall not be displayed.
View About Us	The about us page of the website shall display the following information:

	● History/Background ● Vision ● Mission ● TFYO Team ○ General description ○ Individual images of the members ○ Organization position/titles
View Donate Page	The donate page of the site shall display the following information: ● Bank Account number and bank account name (BPI, GCash) ● GCash QR Code ● *Donate through GoFund Me* button which shall redirect users to the GoFund Me website. ● *Donate through PayPal* button which shall redirect users to the GoFund Me website.
View Testimonials	The testimonials page of the site shall display the following information: ● Featured Story image and description ● Beneficiary testimonials (image and experience) ● Featured school image and description
Send Inquiries	The ask us page of the site shall display a *get in touch with us* form that allows users to send their inquiries to the organization by inputting the following information: ● Full Name (text field) ● E-mail Address (text field) ● Contact number (text field) ● Subject (text field) ● Description/Concern (text field) The system shall display an alert message and send the above information to the organization's email after clicking the *Submit Inquiry* button. The system shall not be able to receive the email if the email address is invalid. The format of the received email should be the following:

	• Subject of the email is the subject sent • The Body of the email is the Concern • The name, contact number, and email should be indicated in the bottom of the email.
Submit a Story	The *join us button* of the top navigation bar shall have a dropdown menu that will display a beneficiary option for the beneficiary form. Users must input the following required information in the application form: • Full Name (text field) • E-mail Address (text field) • Contact Number (text field) • Affiliation (text field) • Story (text field) The system shall display an alert message and send all user information from the form to the database upon clicking the *Register* button.
Apply as a volunteer	The *join us button* of the top navigation bar shall have a dropdown menu that will display a volunteer option for the volunteer application form which requires the following required information: • Full Name (text field) • E-mail Address (text field) • Contact Number (text field) • Category (dropdown menu) • Curriculum Vitae or Resume (upload file and pdf and document files should only be accepted) • ID (verification) (upload button and images should only be accepted) The system shall display an alert message and send all user information from the form to the database upon clicking the *Register* button. If the user joins from the homepage in *Volunteer Opportunities*, the category of the form should have a category chosen.
Log In	The system shall allow administrators to log in using their e-mail and password. The system shall identify each administrator using their registered e-mail in the firebase authentication.

	The system shall display an alert message if the credentials are incorrect.
Admin Navigation Bar	The system shall display a logo and navigation tabs that redirect administrators to any of the following pages: ● Events ● Add Events ● Beneficiaries ● Volunteers The system shall display a log out button that ends the admin session and redirect the user to the admin log in page after logging out. Clicking on the logo in the navigation bar should redirect the admin to the homepage of the website.
Add Events	The add events page of the site (admin view) shall enable the admin to add the event photo, title, schedule, category, platform, and short description of the event. The system shall display a toast notification if event is successfully added. The following input fields indicated should only accept the following: ● Event Photo - accept only image file formats; not empty ● Title - 100 characters max; not empty ● Category - 25 characters max; not empty; must not be existing (case sensitive) ● Platform - not empty ● Time - not past, not empty ● Description - 500 characters max, not empty
Edit Events	The event cards shall have an edit button that enables the admin to modify the event photo, title, schedule, host, platform, visibility, and short description of the event. The system shall display a toast notification if event is successfully edited. Open Event is automatically set to “No” if there is no approved volunteers. Card is displayed under

	Volunteer Opportunities section. The host input field displays the name of volunteer and email. The following input fields indicated should only accept the following: ● Event Photo - accept only image file formats; not empty ● Title - 100 characters max; not empty ● Category - 25 characters max; not empty; must not be existing (case sensitive) ● Platform - not empty ● Schedule - not empty ● Description - 500 characters max, not empty ● Open Event - yes and no only; not empty
Archive Events	The event cards shall have an archive button that removes the selected event from the section only. Upon clicking the archive button, the site shall display a status modal that enables the admin to choose an event status from a dropdown menu (canceled or completed). The ArchiveStatus should not be empty.
Delete Events	The event cards shall have a delete button that removes the selected event from the section and the database. Before deleting an event, a delete event confirmation modal shall appear. The system shall display a toast notification if event is successfully deleted.
View Attendees	The site shall display a *view attendees* button within an event card which redirects the administrator to the event attendees page. The event attendees page shall display all the names of the participants and the total number of registered participants of the selected event. Below the participants list, the event attendees page shall display all the names of the volunteers and the total number of registered volunteers of the selected event.

Manage Beneficary Applicants	The beneficiaries, approved beneficiaries, and declined beneficiaries pages of the site (admin view) shall display the name, email, contact number, and affiliation of all applicants. Each row shall have an archive button that deletes the selected beneficiary instance from the table. New entries appear at the end of the table. The beneficiaries page of the site (admin view) shall display buttons above the list for the approved and declined pages. Upon clicking these buttons, the site shall redirect the admin to the corresponding page. Upon clicking a view button of a beneficiary instance, the system shall redirect the admin to an individual beneficiary view page. The individual beneficiary view shall display the submitted story. Within the individual beneficiary view, the site shall display approve and decline buttons. Upon clicking an approve or decline button, the system shall delete the selected beneficiary from the beneficiaries page and relocate the beneficiary instance to the approved or declined beneficiaries page. The system shall display a toast notification after archiving, approving, and declining the beneficiary.
Manage Volunteer Applicants	The volunteers, approved volunteers, and declined volunteers pages of the site (admin view) shall display the name, email, contact number, and category of all applicants. The volunteers page of the site (admin view) shall display buttons above the list for the approved and declined pages. Upon clicking these buttons, the site shall redirect the admin to the corresponding page. Upon clicking a view button of a volunteer instance, the system shall redirect the admin to an individual volunteer view page. The individual volunteer view shall display the following information:

	• Curriculum Vitae or Resume (downloadable link) • ID (verification) (downloadable link) Within the individual volunteer view, the site shall display approve and decline buttons. Upon clicking an approve or decline button, the system shall delete the selected volunteer from the volunteers page and relocate the volunteer instance to the approved or declined volunteers page. The system shall automatically archive volunteer applications if event is archived or deleted.. The system shall display a toast notification after approving or declining the volunteer.

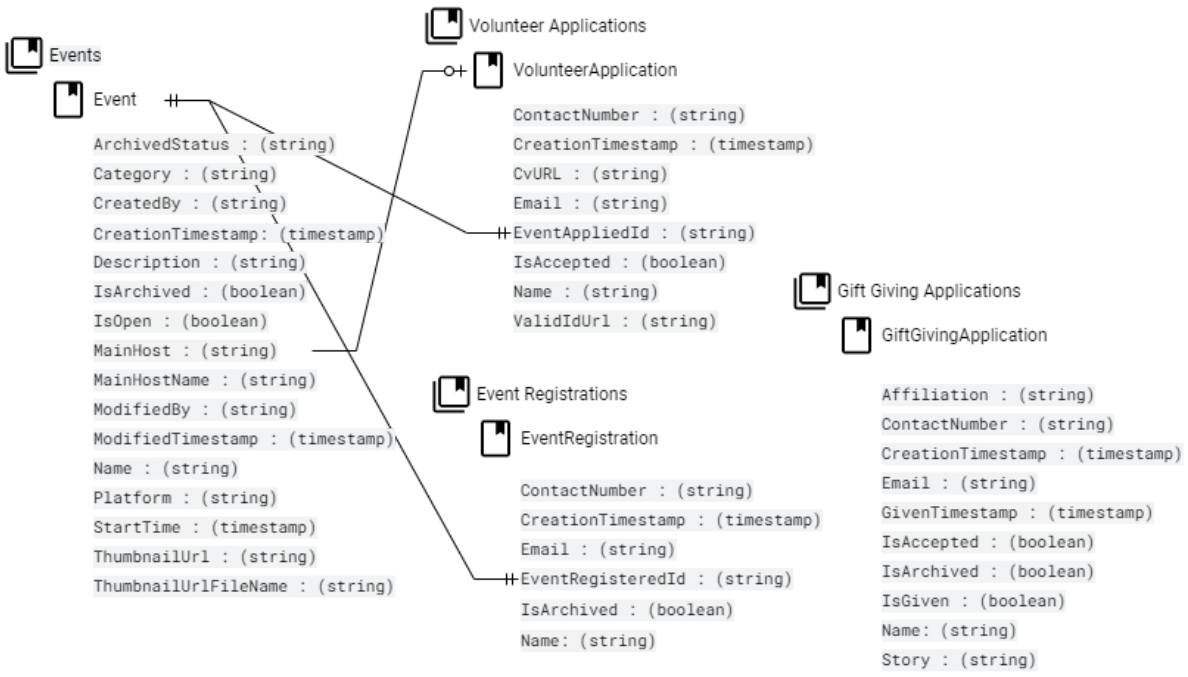

VI. Non-functional requirements

Non-functional requirement	Description
Performance	The database should be able to perform 50,000 document reads per day
	The database should be able to perform 20,000 document writes per day
	The database should be able to perform 20,000 document deletes per day
Availability	The web application should remain accessible and operational 24 hours a day, 7 days a week.
Security	The database of the web application should encrypt the password of registered users
	The contents of the database should only be modified by authenticated users
	Unauthenticated users should not be able to view the administrative side of the web application
Usability	In terms of the System Usability Scale (SUS), the user should be able to use the website with general ease (Scoring above 68).
	Administrators should be able to create new

	documents with ease
	The website design and layout should be consistent
Scalability	The system should be able to handle a couple of hundreds of visitors at once

VII. Database design

A. Firestore Architecture

For this project, the group decided to use Firebase, a Backend-as-a-Service (BaaS), to host the database. Specifically, the group will make use of the Cloud Firestore, Firebase Authentication, and Cloud Storage services to develop the web application.

Cloud Firestore is a NoSQL database that makes it easy to store and sync data for frontend and backend development. The group considered using Firestore because of the following reasons:

1. It is the newest database in Firebase.
2. NoSQL databases are simple to understand.
3. NoSQL databases perform faster compared to traditional relational databases.
4. NoSQL databases provide high availability and fault tolerance.

On the other hand, Firebase Authentication provides backend services that make it easy to authenticate users. For our purposes, we will use email address & password-based authentication to identify web administrators.

The last service to be used is Cloud Storage, which provides the developer with a way to store large unstructured files such as user-generated content (e.g., photos and videos). The group used Cloud Storage because of its capability of being scalable, secure, and robust.

In the database design, a firestore data model would be used for the project which is a document-oriented database. The firestore data model mainly makes use of collections and documents. Collections are containers for documents. These act as the top-level entities in Firestore. They could be comparable to something similar to tables in SQL databases. Documents, on the other hand, are individual records contained in a collection. These documents contain different key-value pairs which could contain different kinds of information.

The database consists of 10 root-level collections: Events, Galleries, GiftGivings, Inquiries, Volunteers, Beneficiaries, Announcements, VolunteerApplications, GiftGivingApplications, and EventRegistrations. The group opted to use root-level collections for two main reasons. First, it is a recommended practice in NoSQL to flatten the database. Second reduces the number of document reads. The documents in the database design are further explained by the data dictionaries and below.

B. Data Dictionaries

Data Dictionary for the Event Document

ArchiveStatus	*STRING*	*The end status of the event*	*CANCELLED*
Category	*STRING*	*The category of the event*	*Cooking*
CreatedBy	*STRING*	*The email address of the admin who created the document*	*daniel.geneta.m@gmail.com*
CreationTimestamp	*TIMESTAMP*	*The point in time when the event was created*	*March 26, 2023 at 5:30:00 PM UTC+8*
Description	*STRING*	*The description of the event*	*This weekend is our Summer Camp for Arts! Today we …*
IsArchived	*BOOLEAN*	*Determines whether the event is archived or not*	*FALSE*
IsOpen	*BOOLEAN*	*Determines whether the event is visible or not*	*TRUE*
MainHost	*STRING*	*The unique ID of the volunteer who will be the main host of the event*	*aRGZw4WUo2DimAx7jU3G*

MainHostName	*STRING*	*The name of the main host*	*Patrick Star*
ModifiedBy	*STRING*	*The email address of the admin who recently modified the document*	*daniel.geneta.m@gmail.com*
ModifiedTimestamp	*TIMESTAMP*	*The point in time when the event was recently modified*	*March 27, 2023 at 5:30:00 PM UTC+8*
Name	*STRING*	*The name of the event*	*Learn to cook with Bob Sy!*
Platform	*STRING*	*The platform where the event will be conducted*	*Zoom*
StartTime	*TIMESTAMP*	*The point in time in which the event will start*	*March 28, 2023 at 5:30:00 PM UTC+8*
ThumbnailUrl	*STRING*	*The event thumbnail URL of the event*	*https://firebasestorage.googleapis.com/v0/b/tfy…*
ThumbnailUrlFileName	*STRING*	*The filename of the thumbnail*	*event3.png*

Data Dictionary for the GiftGivingApplication Document

Affiliation	*STRING*	*The affliation of the beneficiary*	*Philippine High School For The Arts*
ContactNumber	*STRING*	*The contact number of the beneficiary*	*09191234567*
CreationTimestamp	*TIMESTAMP*	*The point in time when the application was created*	*March 28, 2023 at 5:00:00 PM UTC+8*
Email	*STRING*	*The email of the beneficiary*	*joserizal@gmail.com*
GivenTimestamp	*TIMESTAMP*	*The point in time when the admin confirmed that the beneficiary received the gadget*	*June 19, 2023 at 5:30:00 PM UTC+8*
IsAccepted	*BOOLEAN*	*Determines whether the beneficiary application is accepted or not*	*TRUE*

IsGiven	*BOOLEAN*	*Determines whether the beneficiary received the gadget or not*	*TRUE*
Name	*STRING*	*The name of the beneficiary (First Name Last Name)*	*Jose Rizal*
Story	*STRING*	*The story of the applicant*	*Ako po si...*

Data Dictionary for the VolunteerApplication Document

ContactNumber	STRING	The contact number of the volunteer	09192345678
CreationTimestamp	TIMESTAMP	The point in time when the volunteer application was created	March 26, 2023 at 7:30:00 PM UTC+8
CvUrl	STRING	The CV URL of the volunteer	https://firebasestorage.googleapis.com/v0/b/tfy…
Email	STRING	The email of the volunteer	juanpedro@gmail.com
EventAppliedId	STRING	The unique ID of the applied event	UV7E9ejjEI3q2H940HdF
IsAccepted	BOOLEAN	Determines whether the application is accepted or not	TRUE
IsArchived	BOOLEAN	Determines whether the volunteer application is archived or not	TRUE
Name	STRING	The name of the volunteer (First Name Last Name)	Juan Pedro
ValidIdUrl	STRING	The valid ID URL	https://firebasestorage.googleapis.com/v0/b/tfy…

Data Dictionary for the EventRegistration Document

ContactNumber	*STRING*	*The contact number of the beneficiary*	*09191234567*

CreationTimestamp	*TIMESTAMP*	*The point in time when the application was created*	*March 28, 2023 at 5:00:00 PM UTC+8*
Email	*STRING*	*The email of the beneficiary*	*joserizal@gmail.com*
EventRegisteredId	*STRING*	*The unique ID of the event registered*	*UV7E9ejjEI3q2H940HdF*
IsArchived	*BOOLEAN*	*Determines whether the beneficiary registration is archived or not*	*TRUE*
Name	*STRING*	*The name of the beneficiary (First Name Last Name)*	*Jose Rizal*

VIII. Features of the System

A. Features

1. Navigation Bar

   It is a graphical user interface element that is placed at the top of the website. It is used to provide users with a way to navigate through the different sections or pages of the website. Particularly, the users would be able to navigate to the following: Home, About Us, Testimonials, Ask Us, Applying as a Volunteer, Applying as a Beneficiary, and the donation page.

2. Call to Action

   The website has a clear call-to-action that encourages visitors to donate or get involved with the organization. The donation page, signing up as a volunteer or beneficiary are included in this feature.

3. Images

The website is accompanied by images to provide visitors with a visual presentation. These visuals will be images containing featured events, activities, or anything related to the organization.

4. Internal Links

Internal links are hyperlinks that point from one page to another within the same website or domain. They are used to connect different pages of a website and help visitors navigate between them. It is used to help improve the user experience, website navigation, and search engine optimization. These internal links are mainly used in the navigation bar, footer, checking of events, and checking of volunteers and beneficiaries information

5. Testimonials

Testimonials are statements or comments from individuals or organizations that express their positive experiences or opinions about a product, service, or brand. For this website, testimonials from beneficiaries, volunteers, and people who have benefited from the organization's work can help build trust and credibility.

6. Footer

At the very bottom of every page, there are hyperlinked list of places where visitors commonly wish to navigate. These site locations will be the home page, the organization’s “about” page, testimonials, and social media icons that are pertinent to the users’ experience.

7. Social Media Icons/Links

Links to the organization's social media pages can help visitors stay connected and engaged with the organization's work. Facebook, Instagram, and the Youtube page are the ones included in the social media icons and links.

8. Contact Info

Contact information enables potential beneficiaries to get in touch with the organization through their official email or social media handles.

9. Contact Form

The contact form allows visitors of the system to express any concerns they have with the organization by receiving their full name, email address, contact number, subject of a concern, and concern that they wish to discuss.

10. Biography

The biography feature of the system informs its visitors of the organization’s purpose and advocacy. The organization’s mission and vision can be viewed on the About Us page.

11. Team/Members

The team/members are the backbone of the organization, who potential volunteers and beneficiaries are likely to interact with during events. They are also individuals who share the same goal as and are committed to fulfilling the objectives of the organization. Their details may be viewed at the end of the About Us page.

12. Blog/News Section

A blog or news section can provide updates on the organization's work and keep visitors informed about current events and issues related to the organization's mission.

13. Donations

The website should have a donation page that is easy to read and navigate. The page allows donors to give donations and provide options for different payment methods, such as GCash, Paypal, GoFundMe, and BPI.

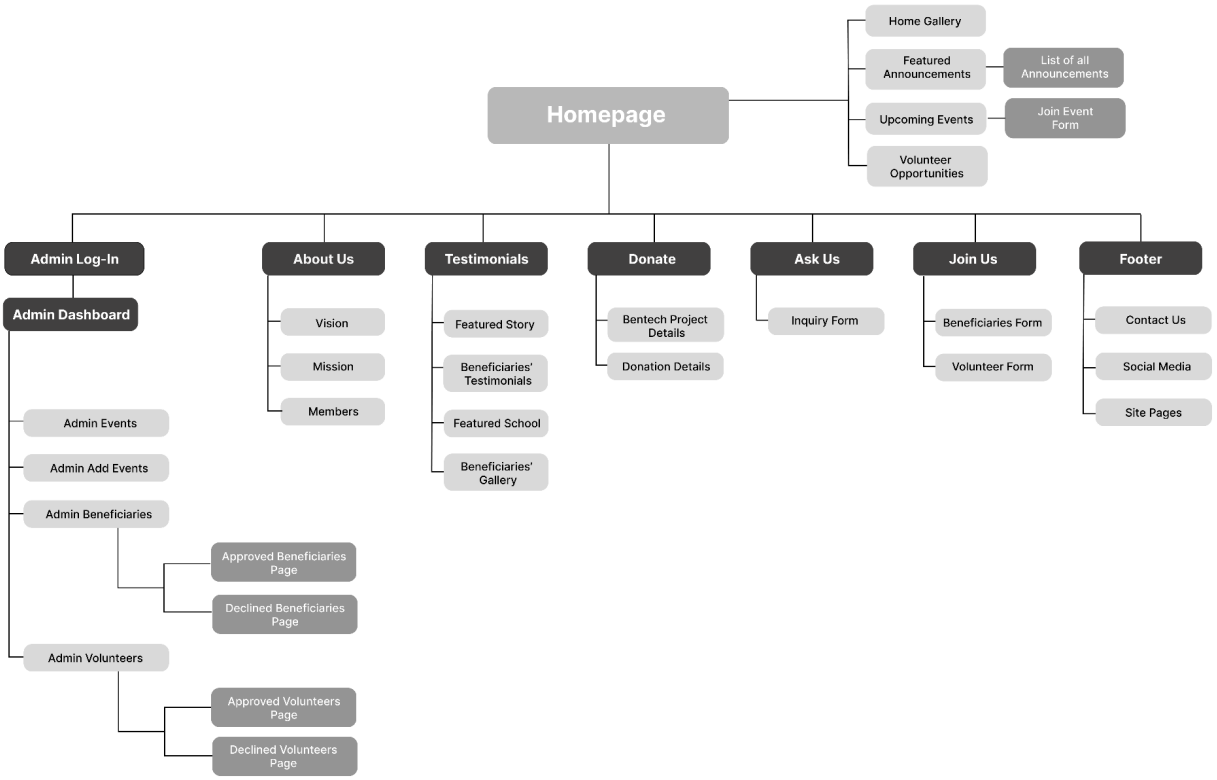

14. Volunteer Form

The Volunteer Form receives the information of interested volunteers, such as their full name, email address, contact number, category, valid ID, and resume. This form will allow administrators to review potential volunteers for the community.

15. Beneficiary Form

The Beneficiary Form receives the information of potential beneficiaries, such as their full name, email address, contact number, affiliation, and their story as to why they desire the aid of the organization. This form will allow the administrators to determine if an applicant is most deserving of their community’s help.

B. Sitemap with description

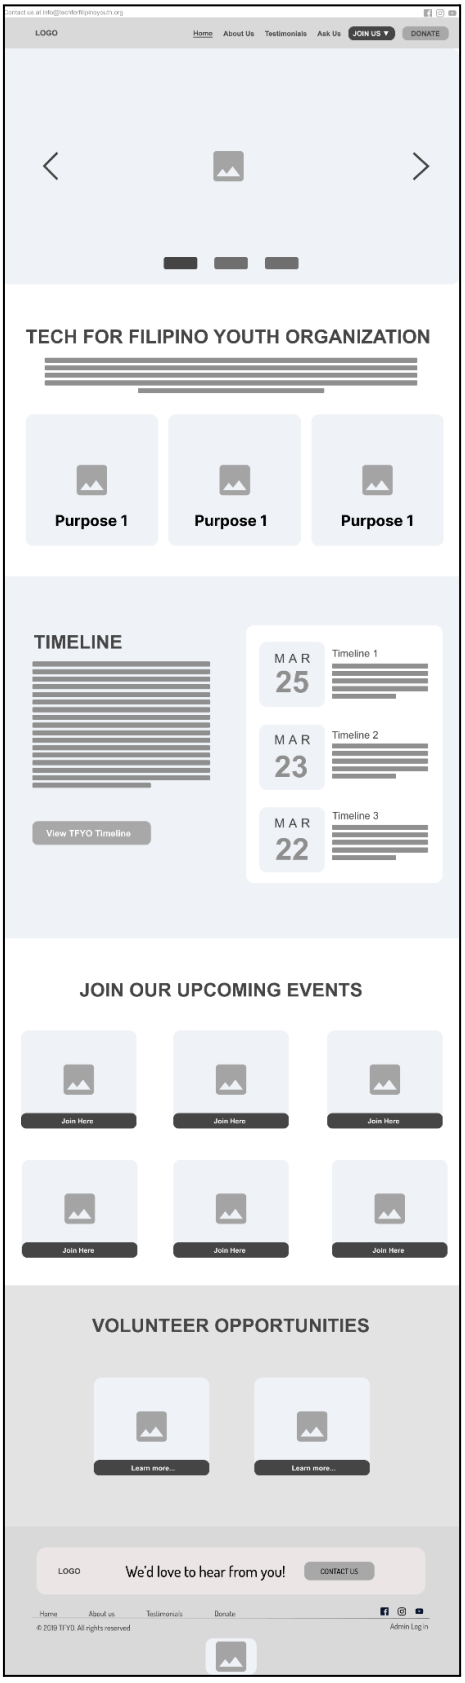

This sitemap provides an overview of the website's structure and content, allowing users to quickly navigate to the pages they need. The Homepage is the main entry point to the website and includes a home gallery, featured announcements, and events. Visitors may also click on the featured announcements to see the list of all announcements or click on any event to answer and fill up the join event form. The About Us page provides information about the organization's history, mission, and team. It includes information about the organization's values, goals, and achievements. The Testimonials page includes a featured story, beneficiary testimonials, featured school, and volunteer testimonials, which helps build trust and credibility with visitors. The Donate page includes donation details and payment methods that donors can utilize. The Ask Us page allows visitors to contact the organization. It consists of an inquiry form that asks for the user's full name, email address, phone number, inquiry

subject, and the user's concern description. The Application page allows visitors to express their interest in volunteering or receiving services from the organization. This page includes two forms, a beneficiary form, and a volunteer form. The forms will ask for basic personal information, such as full name, email address, and contact number, as well as questions about the user's validity. The footer includes links to the Contact Us page and social media sites of the organization. Lastly, the user can log in as an admin and be directed to the Admin Homepage. On this page, administrators can view the gallery, announcements, events, and lists of pending, approved, and declined forms of beneficiaries and volunteers.

IX. Communication Letter

March 26, 2023

Dear Aldrin Licayan:

We hope this letter finds you well. As part of a course requirement for our college program, our group is required to create a website for an organization. After careful consideration, we have chosen your organization, Tech for Filipino Youth Organization, as the subject for this project. As such, we would like to inquire about the possibility of creating a website for your organization. As Computer Science college students, we are currently studying web development and would like to gain practical experience creating websites for businesses and organizations.

Our group, under the supervision of our professor, is confident in our abilities to create a professional and visually appealing website that will meet your organization's needs. This project aims to showcase our web development skills while providing a valuable tool for your organization to showcase your services and reach a wider audience.

We will be responsible for all aspects of the website design and development, including the creation of a sitemap, wireframes, and final design, as well as the development and testing of the website.

We understand you may have questions or concerns regarding this project, and we are happy to address them anytime through a call or meeting. Additionally, we are open to feedback and suggestions throughout development to ensure that the final product meets your expectations.

Thank you for considering our proposal for this project. We look forward to working with you and creating a website that will be valuable to your organization.

Sincerely,

Christina Beatrice G. Alegre | Mark Moises T. Cortez | Daniel M. Geneta

Alyssa Mae M. Pepito | Aron Nick C. Santos | Keziah Antonette C. Soleño

College Students from Mapúa University

Approved by:

Aldrin Licayan
Founder and CEO of Tech for Filipino Youth Organization

X. Functions of the system

The **JOIN OUR UPCOMING EVENTS** section is a dynamic feature of the website that contains the event cards for all the organization's upcoming events. Each card contains the following details: Time, Host, Platform, and Event Description. The cards in this section are only the events with an approved host. It has a *Join Here* button that redirects the user to an event registration form that has a set category based on the event card selected.

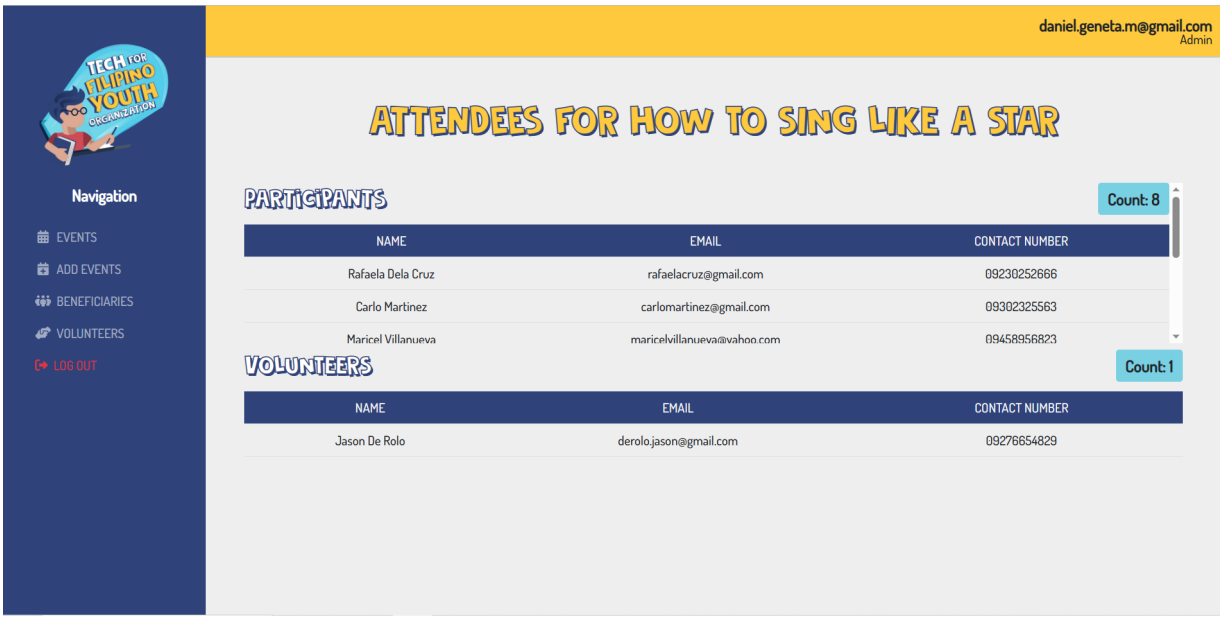

The **VOLUNTEER OPPORTUNITIES** section is a dynamic feature of the website that contains the announcement cards for the events the organization is planning to hold. Its main purpose is to the public that the organization is looking for talented and/or skilled volunteers.

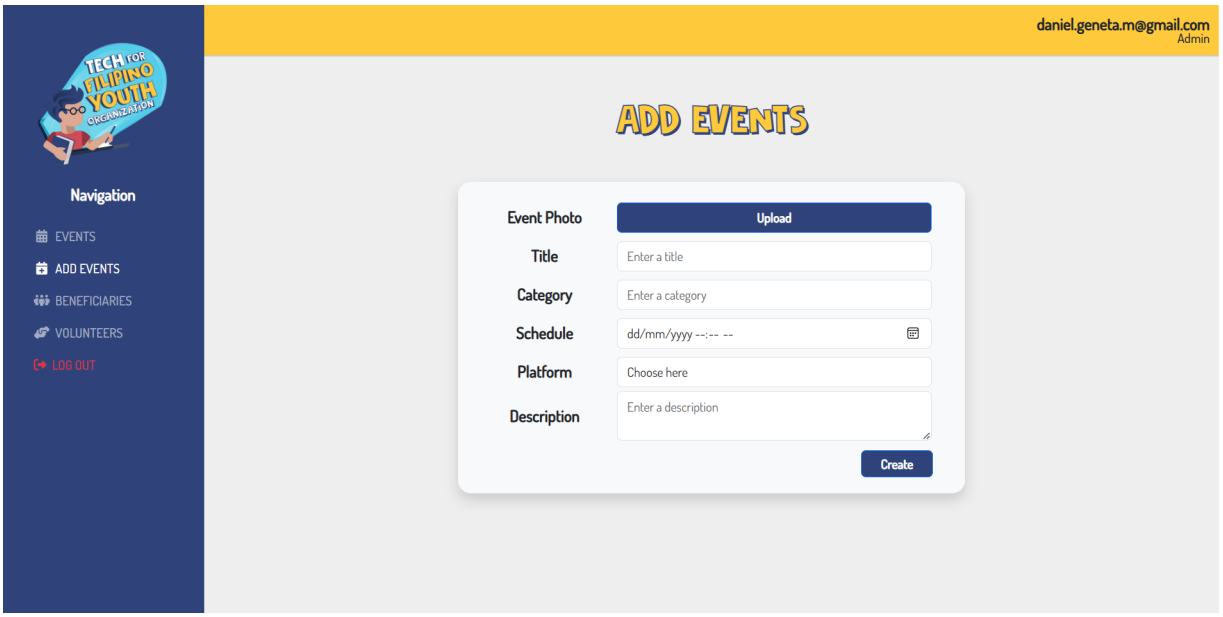

The **EVENTS page** of the admin website is a dynamic feature that contains the event cards for all events (with or without approved hosts). Events with approved hosts are set as visible to the users and are displayed in the **JOIN OUR UPCOMING EVENTS** section. Events without approved hosts are not open for registration and are displayed in the **VOLUNTEER OPPORTUNITIES**. Each card contains an edit button for the admin to modify the event details seen by the guest users. It also includes an archive button to remove the event card from the **EVENTS page and JOIN OUR UPCOMING EVENTS** section. Archived events are marked as canceled or completed; they are stored in the database for event history and record purposes. The delete button is developed to erase event cards that are incorrectly created or added. Below each card is the metadata for event creation so that the organization can monitor who created the event, who made the last modifications, and when the last modifications were made.

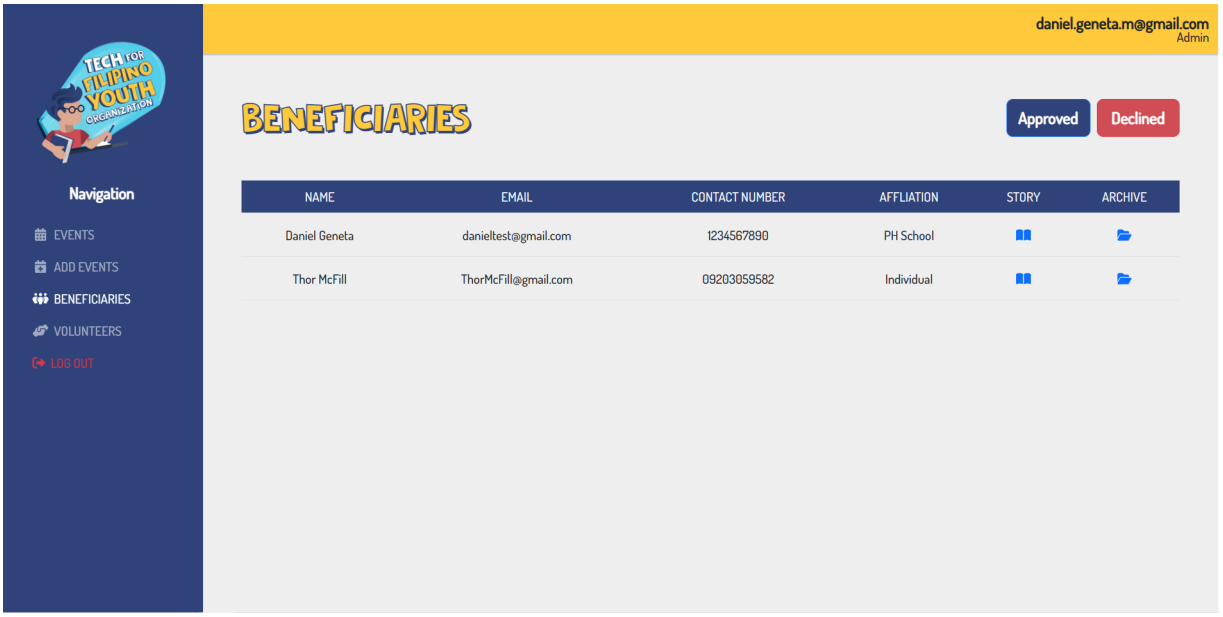

Each card also has a *View Attendees* button that shows the list and count of beneficiaries and volunteers for record and monitoring purposes. Since some platforms have a maximum number of participants, this function enables the admin to see if the event should be closed and set as not visible to the users based on the count.

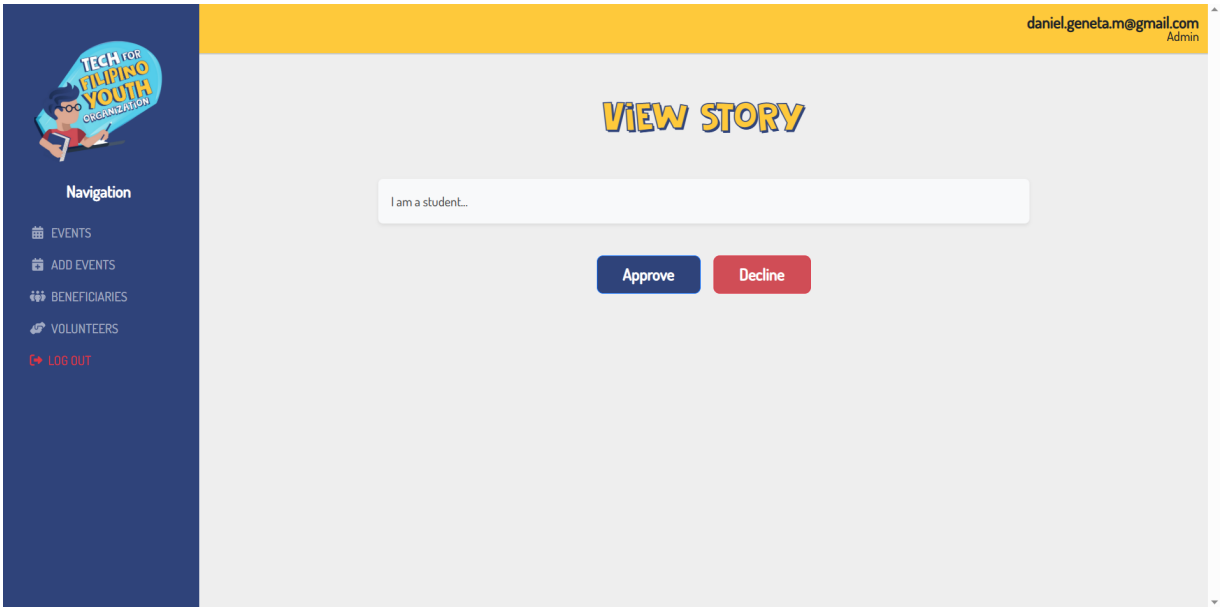

The **ADD EVENTS page** of the admin website is a dynamic feature that enables the admin to create the event cards discussed in the above features.

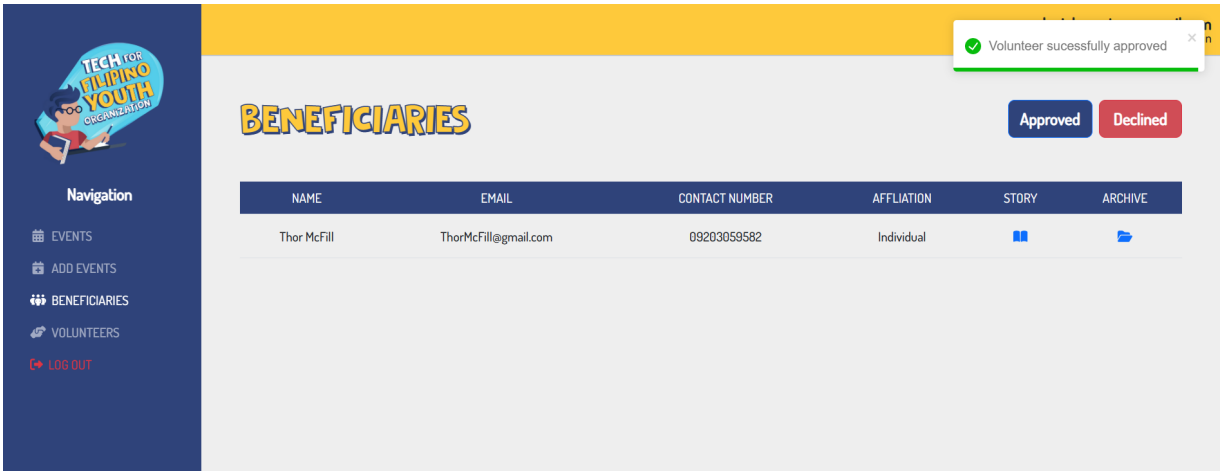

The manage beneficiaries functionality of the website addresses the operations for choosing the beneficiaries of the organization's *Submit a Story* event. The **BENEFICIARIES page shows** a table of individuals who wish to receive a gadget from the organization. The *Story* column of the table contains a *book* button that redirects the admin to the submitted story of an individual. The *archive* button was developed to prevent the page from having too many entries over time. The archived data are removed from the table but are retained in the database for future use.

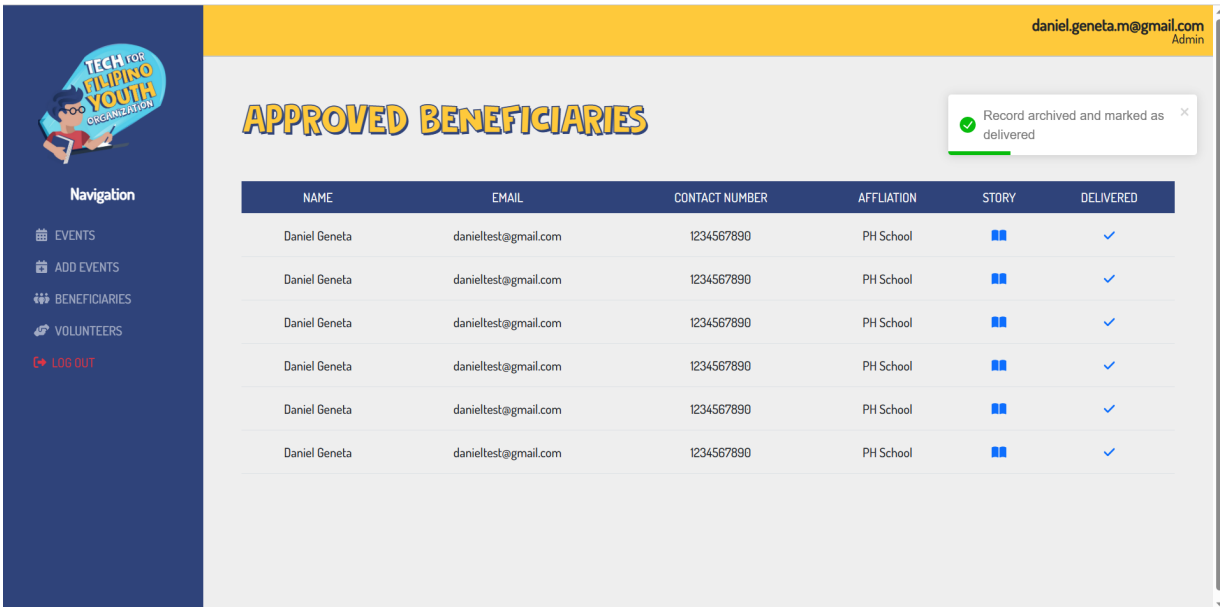

The **VIEW STORY** page contains the submitted story of an individual, which will be used as the main criterion if the applicant deserves to be one of TFYO's beneficiaries. There is an *Approve* button if the organization wishes to grant the applicant a gadget and a decline button if the applicant fails to provide a good story.

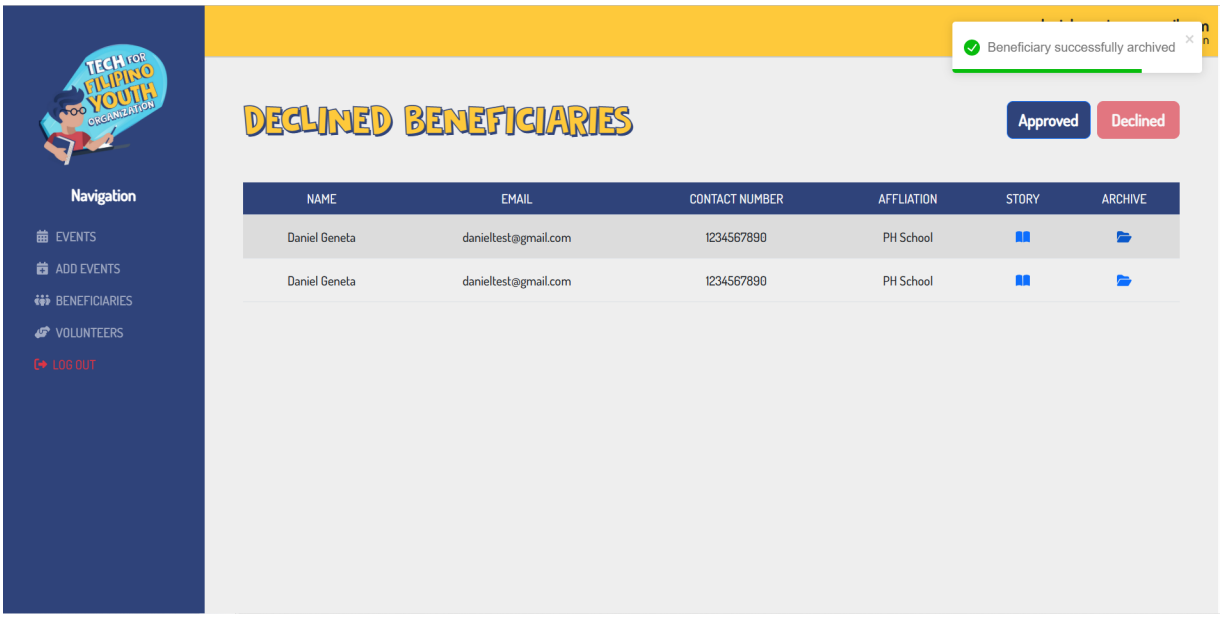

The screenshot below simply shows that admin actions have appropriate toast notifications to inform that their actions are successful.

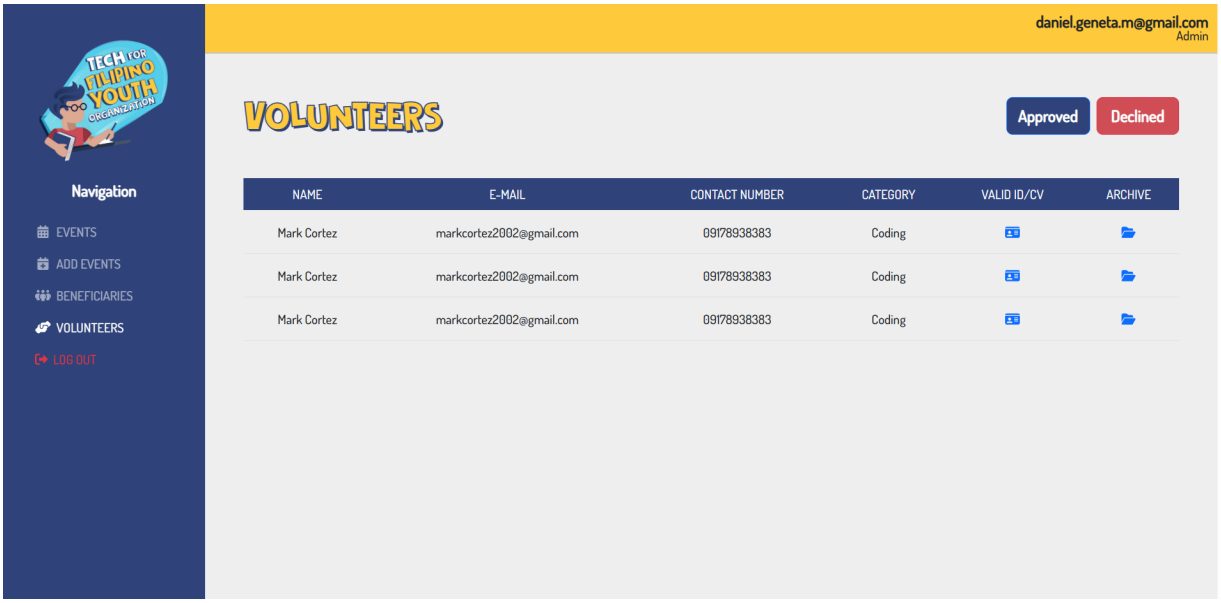

The **APPROVED BENEFICIARIES** page contains a list of individuals who will be granted a tablet for their education. This page still has a *book* button that includes the story and a decline button. The decline button still allows the admin to decline an approved volunteer for reasons including but not limited to incorrect approval and sudden rejection. This table now contains a *Delivered* column that allows the admin to remove an entry if the gadget was delivered successfully to the beneficiary. Similarly, this action only archives the data for record purposes.

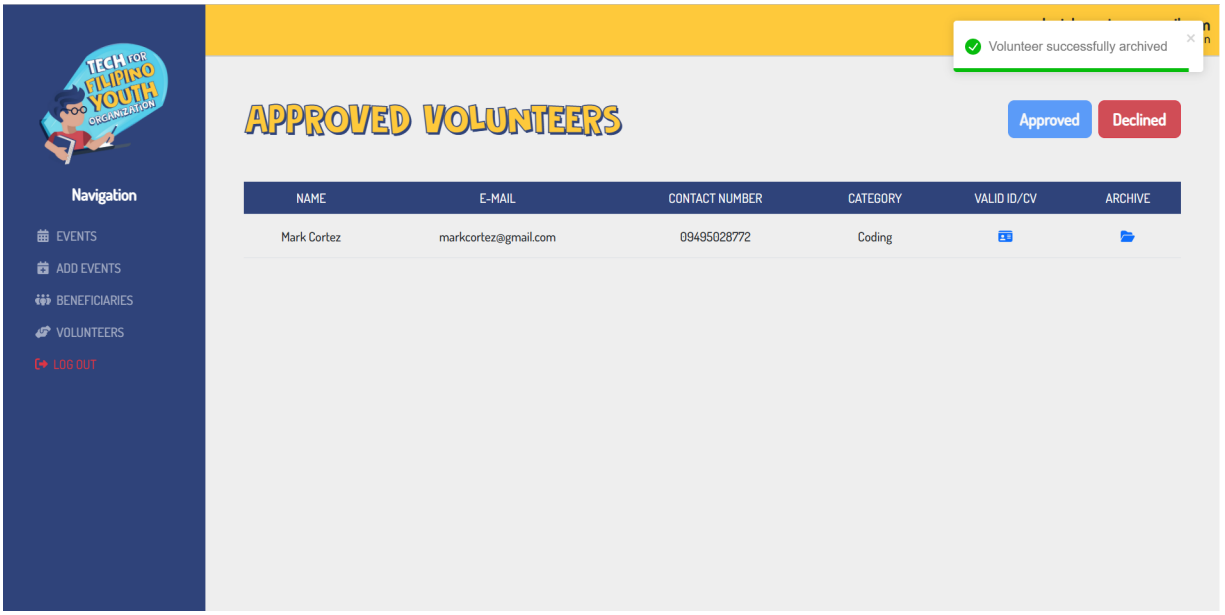

The **DECLINED BENEFICIARIES** page contains a list of individuals who are initially denied to be TFYO's beneficiaries. This page still has a *book* button that includes the story and an approve button. The *approve* button still allows the admin to approve a declined volunteer for reasons including but not limited to incorrect rejection and sudden approval. This table contains an *Archive* column to remove the entry from the table. Similarly, this only archives declined beneficiaries so the organization can store and recommend them to other organizations.

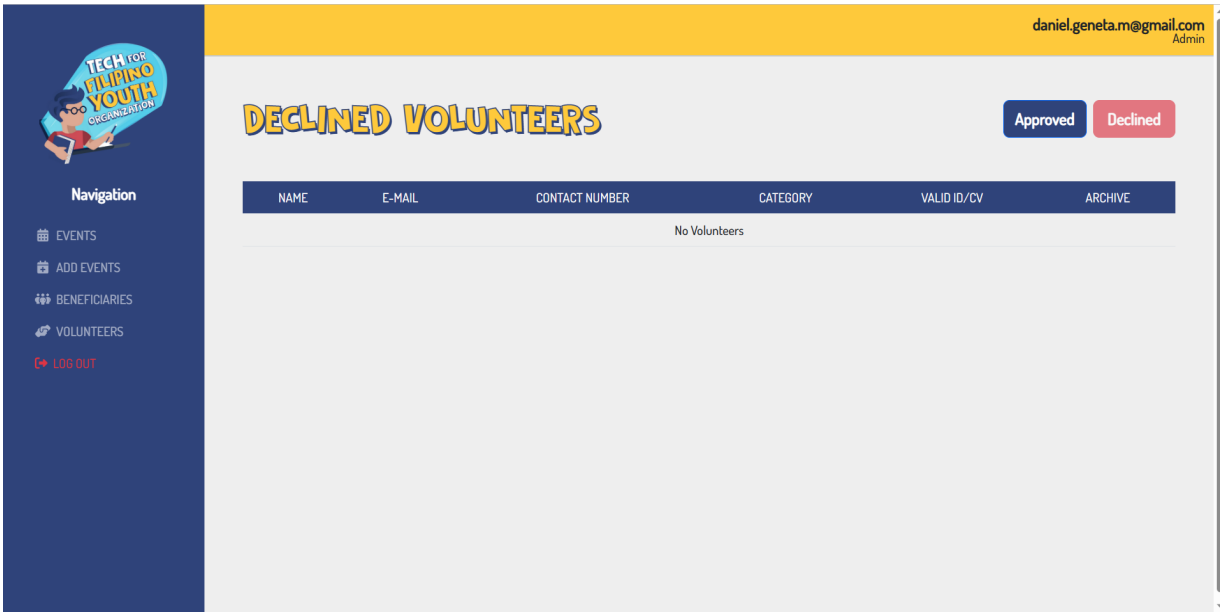

The manage volunteers functionality of the website address the operations for choosing the volunteers for the organization's free lessons or summer camps. The **VOLUNTEERS page** shows a table of interested and talented individuals who wish to share their knowledge for free. This functions similarly to the beneficiaries page of the site, as the admin can also decline and approve volunteers based on their qualifications and/or credentials. Unlike the beneficiaries page, volunteer data are automatically removed from the table once the event they signed up to is archived or deleted.

The **APPROVED VOLUNTEERS page** of the site contains a list of volunteers who were selected by the organization to be part of their summer camps/free lessons. Only volunteers from this page appear as options from the host dropdown menu in the **Edit Event cards.** Similar to the manage beneficiaries functionality, approved volunteers can also be archived or declined.

The **DECLINED VOLUNTEERS page** of the site contains a list of volunteers who were not chosen to be part of the free lessons/summer camps. On this page, the admins can still approve declined volunteers if ever the currently approved volunteer for an event cannot continue due to various reasons, including but not limited to sickness, schedule issues, and emergencies. The admins can also archive declined volunteers for record purposes.

B. Test Cases

a. Navigation Bar

Test Case ID	TFYO_NB_01
Test Case Description	Verify the Top Navigation Bar Functionality of Tech for Youth Organization.
Created By	Chris Alegre
Date Tested	April 20, 2023
Pre-condition	Access to browser
Test Scenario	Verify that the guest user can navigate TFYO's website using the top navigation bar.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to TFYO | Home (tfyo-12e98.web.app).	The website shall display the navigation bar at the top of the home page.	As Expected	Pass
2	Click the LOGO.	The user shall be redirected to the About us page.	As Expected	Pass
3	Click the Home tab.	The user shall be redirected to the home page.	As Expected	Pass
4	Click the About us tab.	The user shall be redirected to the About us page.	As Expected	Pass
5	Click the Testimonials tab.	The user shall be redirected to the Testimonials page.	As Expected	Pass
6	Click the Ask Us tab.	The user shall be redirected to the Ask us page.	As Expected	Pass

7	Click the Join Us button.	The button shall display a dropdown menu showing two options: Beneficiary and Volunteer.	As Expected	Pass
8	Click the Beneficiary option from the Join Us dropdown menu.	The user shall be redirected to the beneficiary application page.	As Expected	Pass
9	Click the Volunteer option from the Join Us dropdown menu.	The user shall be redirected to the volunteer application page.	As Expected	Pass
10	Click the Donate button.	The user shall be redirected to the Donate page.	As Expected	Pass
11	Click the Facebook icon.	The user shall be redirected to TFYO's Facebook page.	As Expected	Pass
12	Click the Instagram icon.	The user shall be redirected to TFYO's Instagram account.	As Expected	Pass
13	Click the Youtube icon.	The user shall be redirected to TFYO's Youtube account.	As Expected	Pass

b. Footer

Test Case ID	TFYO_FN_02
Test Case Description	Verify the Footer Navigation Functionality of Tech for Youth Organization.
Created By	Chris Alegre
Date Tested	April 20, 2023
Pre-condition	Access to browser.
Test Scenario	Verify that the guest user can navigate TFYO's website using the footer.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to TFYO | Home (tfyo-12e98.web.app).	The website shall display the footer at the end of the home page.	As Expected	Pass
2	Click the logo.	The user shall be redirected to the top of the page.	As Expected	Pass
3	Click the Contact us button.	The user shall be redirected to the Ask us page.	As Expected	Pass
4	Click the Home link.	The user shall be redirected to the Home page.	As Expected	Pass
5	Click the About us link.	The user shall be redirected to the About us page.	As Expected	Pass
6	Click the Testimonials tab.	The user shall be redirected to the Testimonials page.	As Expected	Pass
7	Click the Donate link.	The user shall be redirected to the Donate page.	As Expected	Pass
8	Click the Facebook icon.	The user shall be redirected to TFYO's Facebook page.	As Expected	Pass
9	Click the Instagram icon.	The user shall be redirected to TFYO's Instagram account.	As Expected	Pass
10	Click the Youtube icon.	The user shall be redirected to TFYO's Youtube account.	As Expected	Pass
11	Click the Admin Log In link.	The user shall be redirected to the Admin Log in page.	As Expected	Pass

c. View Photo Gallery

Test Case ID	TFYO_PG_03
Test Case Description	Verify the Photo Gallery of Tech for Youth Organization.
Created By	Chris Alegre
Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view TFYO's photos in the photo gallery.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	A slider of images should be displayed.	As Expected	Pass
2	Click the right arrow.	The next image shall be displayed in the slider.	As Expected	Pass
3	Click the left arrow.	The previous image shall be displayed in the slider.	As Expected	Pass

d. View Introduction Banner

Test Case ID	TFYO_IB_04
Test Case Description	Verify the Introduction Banner of Tech for Youth Organization.
Created By	Alyssa Pepito
Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website

Test Scenario	Verify that the guest user can view TFYO's Introduction Banner in the Home page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Three (3) cards for TFYO's main activities (Summer Camp Recital, Brigada TechSkwela, and Fundraising Concert) and a short description shall be displayed.	As Expected	Pass

e. View Featured Timeline

Test Case ID	TFYO_FT_05
Test Case Description	Verify the Featured Timeline Cards of Tech for Youth Organization.
Created By	Daniel Geneta
Date Tested	April 17, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view TFYO's Featured Announcements Section in the Home page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Three (3) Timeline Cards, a general timeline description, and a *View the TFYO Timeline* button should be displayed.	As Expected	Pass

f. View Timeline

Test Case ID	TFYO_OT_06
Test Case Description	Verify the Overall Timeline webpage of Tech for Youth Organization.
Created By	Daniel Geneta
Date Tested	April 17, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view TFYO's overall timeline.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Three (3) Announcement Cards, a general timeline description, and a *View Timeline* button should be displayed.	As Expected	Pass
2	Click the *View TFYO Timeline* button.	The website shall redirect the user to the Overall Timeline webpage. Timeline Cards with date and short description should be displayed.	As Expected	Pass

g. View Events

Test Case ID	TFYO_UE_07
Test Case Description	Verify the Upcoming Events section of Tech for Youth Organization.
Created By	Aron Santos

Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view TFYO's upcoming events in the Home page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Click an event card.	A popup modal containing the details of the selected event and a *back* button shall appear.	As Expected	Pass
3	Click the *back* button.	The popup modal shall disappear.	As Expected	Pass

h. Join Events

Test Case ID	TFYO_JE_08
Test Case Description	Verify TFYO's Events Application Form.
Created By	Christina Alegre
Date Tested	April 22, 2023
Pre-condition	Access to TFYO Website

Test Scenario	Verify that the guest user can register in an event from the upcoming events section in the Home page and submit an event application form.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Select an event and click the *join here* button.	The user shall be redirected to the event registration form with the category set as the selected event.	As Expected	Pass
3	Enter Full Name	Full name can be entered and should be displayed in the Full Name field.	As Expected	Pass
4	Enter Email Address	Email Address can be entered and should be displayed in the Email Address field.	As Expected	Pass
5	Enter Contact Number	Contact Number can be entered and should be displayed in the Contact Number field.	As Expected	Pass
6	Choose a category from the category dropdown menu.	Chosen category is displayed in the category field.	As Expected	Pass
7	Click the *Register* button.	Guest user shall be able to submit the application form.	As Expected	Pass

Test Case ID	TFYO_JE_09
Test Case Description	Verify TFYO's Events Application Form.

Created By	Christina Alegre
Date Tested	April 22, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user cannot submit an incomplete events application form.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Select an event and click the *join here* button.	The user shall be redirected to the event registration form with the category set as the selected event.	As Expected	Pass
3	Set at least one (1) field empty.	Input details are displayed in their respective fields.	As Expected	Pass
4	Click the *Register* button.	*Please check the form for errors* alert is displayed and *Value is required* error message appears below the empty fields. Guest user shall not be able to submit the form.	As Expected	Pass

Test Case ID	TFYO_JE_10
Test Case Description	Verify TFYO's Events Application Form.

Created By	Christina Alegre
Date Tested	April 22, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user cannot submit an empty events application form.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Select an event and click the *join here* button.	The user shall be redirected to the event registration form with the category set as the selected event.	As Expected	Pass

Test Case ID	TFYO_JE_11
Test Case Description	Verify TFYO's Events Application Form.
Created By	Christina Alegre
Date Tested	April 22, 2023

Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user may not submit an events application form.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Select an event and click the *join here* button.	The user shall be redirected to the event registration form with the category set as the selected event.	As Expected	Pass
3	Fill in all the required fields.	Input should be displayed in the corresponding input field.	As Expected	Pass
4	Click any of the tabs on the navigation bar or the browser's back button.	Inputs made by the guest user will not be saved, and the application form will not be submitted.	As Expected	Pass

Test Case ID	TFYO_JE_12
Test Case Description	Verify TFYO's Events Application Form.
Created By	Christina Alegre
Date Tested	April 22, 2023
Pre-condition	Access to TFYO Website

Test Scenario	Verify that the guest user cannot submit an events application form if there is an input with invalid format.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Upcoming Events section with event cards shall be displayed after the Featured Timeline Section.	As Expected	Pass
2	Select an event and click the *join here* button.	The user shall be redirected to the event registration form with the category set as the selected event.	As Expected	Pass
3	Set either the e-mail address or contact number field to be invalid. Then, click anywhere outside of the input field.	An *Invalid [Input Label] format* error message will appear below the input field.	As Expected	Pass
4	Click the *Register* button.	*Please check the form for errors* alert is displayed. Guest user shall not be able to submit the form.	As Expected	Pass

i. View Volunteer Opportunities

Test Case ID	TFYO_VO_13
Test Case Description	Verify the Volunteer Opportunities section of Tech for Youth Organization.
Created By	Mark Cortez
Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website

Test Scenario	Verify that the guest user can view TFYO's announcements regarding volunteer opportunities in the Home page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Volunteer Opportunities section shall be displayed at the end of the page.	As Expected	Pass
2	Select a card and click the *Learn More* button.	A popup modal containing the event details and *sign up and back* buttons shall appear.	As Expected	Pass
3	Click the *back* button.	The popup modal shall disappear.	As Expected	Pass

Test Case ID	TFYO_VO_14
Test Case Description	Verify the Volunteer Opportunities section of Tech for Youth Organization.
Created By	Mark Cortez
Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can apply as a volunteer from the volunteer opportunities sections in the Home page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Home Page.	Volunteer Opportunities section shall be displayed at the end of the page.	As Expected	Pass

2	Select a card and click the *Learn More* button.	A popup modal containing the event details and a *sign up* button shall appear.	As Expected	Pass
3	Click the *sign up* button.	The user shall be redirected to the volunteer application form with the category set as the selected event. The user can still change the category by choosing another option from the dropdown menu.	As Expected	Pass

j. View About Us

Test Case ID	TFYO_AU_15
Test Case Description	Verify the About us page of Tech for Youth Organization.
Created By	Mark Cortez
Date Tested	April 20, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view the information in the About us page.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the About us Page.	The site shall display the images and descriptions for the Background, Vision, and Mission. The site shall display the team behind	As Expected	Pass

		TFYO, including their images and positions.		

k. View Donate Page

Test Case ID	TFYO_DP_16
Test Case Description	Verify the Donate Page of Tech for Youth Organization.
Created By	Mark Cortez
Date Tested	April 12, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view TFYO's Bank Account Details.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to Donate Page	PayPal Donate Button, Gcash QR Code, GoFundMe Donate Button, and BPI Bank Account Details should be displayed.	As Expected	Pass
2	Scan Gcash QR Code	Gcash App should detect and Identify the account associated to the QR code.	As Expected	Pass
3	Click *Donate through GoFundMe* button	The user should be redirected to the *Dsitance Learning Support for Filipino Youth* GoFundMe Site.	As Expected	Pass
4	Click *Donate through PAYPAL* button	The user should be redirected to the PayPal Bank Transfer Page.	As Expected	Pass

l. View Testimonials

Test Case ID	TFYO_BT_17
Test Case Description	Verify the Beneficiary Testimonials page of Tech for Youth Organization.
Created By	Daniel Geneta
Date Tested	April 17, 2023
Pre-condition	Access to TFYO Website
Test Scenario	Verify that the guest user can view the testimonies of TFYO beneficiaries.

Step #	Step Details	Expected Results	Actual Results	Pass/Fail
1	Navigate to the Testimonials Page.	The webpage shall display the featured brigadaeskwela story section, beneficiaries testimonials section, featured school section, and beneficiaries' gallery. The brigadaeskwela story section shall display a single image and description. The beneficiaries testimonials section shall display beneficiary name, image, and testimony. The featured school shall display a single image and description. The gallery shall display images of beneficiaries.	As Expected	Pass

m. Send Inquiries

Project Title: Tech for Filipino Youth Organization Website

Project Start Date: March 25, 2023

Project End Date: April 29, 2023

Summary of Project:

The Tech for Filipino Youth Organization website was developed to create an online presence for the organization and showcase its mission, vision, and programs.

Project Outcome:

The Tech for Filipino Youth Organization website was successfully completed and delivered to Aldrin Licayan, CEO and Founder of the organization. The website met the project objectives and requirements agreed upon by both parties.

Project Sign-off:

By signing this document, the project client and project members confirm that the project has been completed to the satisfaction of all stakeholders.

Christina Beatrice G. Alegre | Mark Moises T. Cortez | Daniel M. Geneta

Alyssa Mae M. Pepito | Aron Nick C. Santos | Keziah Antonette C. Soleño

Project Members

Aldrin Licayan

Project Client and CEO of Tech for Filipino Youth Organization Website

Signed on April 29, 2023

Note: This sign-off document signifies the completion and acceptance of the Tech for Filipino Youth Organization website by the project client. Any further changes or updates to the website will require a change request and a new sign-off process.
